Subject: Please Support a Strong Clean Car Standard

Comment:

<div>As a lifelong Californian and parent of young children who cares deeply about the future health and well-being of my community, I urge the Board to adopt stronger standards for new vehicle sales.</div>
<div> </div>
<div>The time for half-measures has lost past. The technology transition is well-underway. Now is the time to send a strong mandate to manufacturers that is commensurate with the crisis at hand. Vehicles sold in 2030 will still be on the road in 2040 and beyond. In 2022 there are more electric options than ever before, and the efficiency and cost of batteries are dropped precipitously in the past decade. </div>
<div> </div>
<div>In 2020 over 70% of all new vehicles sold in Norway were electric.Your and California's leadership on this issue is no longer at the forefront. In 2021 only 12% of new vehicles sold in the Golden State were electric. Will Ferrell said he wouldn't stand for it. Why are you setting the bar so low when other countries have already surpassed a goal you've proposed for eight years from now?</div>
<div> </div>
<div>I urge you to seize this opportunity to set the bar for the world by adopting:</div>
<div> </div>
<div>1. a target of 100% of new vehicles being zero-emission in 2030; and</div>
<div>2. equity standards that ensure that automakers increase access to ZEVs for pollution-burdened communities.</div>
<div> </div>
<div>Now is not the time for half-measures. Please adopt a 100% clean car standard by 2030.</div>
<div> </div>
<div>Thank you for your consideration and commitment to the

health of all Californians,</div>

Email Address: Justin.Ciampa@gmail.com

Affiliation: Citizens' Climate Lobby CA State Parks

Subject: CARB can help achieve 75% of new vehicles in CA be zero-emission by 2030

Comment:

<p>We ask CARB to provide incentives and regulations to achieve a target of 75% of new vehicles in CA be zero-emission in 2030, in order to maximize pollution reductions and the number of clean cars in the market. This will allow CA to continue to be at the vanguard of cleaner tech while promoting high-quality careers and economic development. </p><p> </p><p>We are also asking that CARB include strong equity standards that ensure automakers increase affordability and access to ZEVs for disadvantaged communities, which face the worst impacts of air pollution and climate change.</p><p>Please also consider incentives to induce conversion to electric leaf blowers from fossil fuel powered equipment without pollution controls. </p>
