Subject: Demanding Real Climate Solutions in the Scoping Plan

Comment:

<p>Dear California Air Resources Board,</p>
<p>The efficiency of this Scoping Plan is important to me because I am terrified of the future of my children. We need real climate solutions immediately; our children's lives (and ours') are at stake!</p>
<p>Californians deserve clean air and a future beyond oil and gas. We deserve clean transportation options that work for all of our communities.</p>
<p>But the draft 2022 Scoping Plan is a huge step backward for California, doubling down on fossil fuel infrastructure at a time when we need to be phasing out fossil fuels. California can do so much better than this.</p>
<p>In this year's Scoping Plan, we have an opportunity to commit California to bold action. I am calling on you include the following as priorities in the 2022 Climate Change Scoping Plan:</p>
<p>1. A full, coordinated phase out of fossil fuels, with targets for oil refining by 2045, oil and gas extraction by 2035, and a clean electric grid by 2035.</p>
<p>2. Accelerate and scale up investments in clean vehicles and mass transit for working class Californians.</p>
<p>3. Eliminate reliance on climate policy dead ends like Carbon Capture and Storage (CCS) on polluting fuel sources.</p>
<p>Will you help California achieve our climate goals by including the priorities above in this year's Scoping Plan?</p>
<p>Thanks,</p>
<p>Cindy Colburn</p>
