Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

<p>I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p>I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Comment:

Dear Madam/Sir,

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

For the only planet we have.

Subject: Draft 2022 Climate Change Scoping Plan

Comment:

<p>Not good enough at this late date.</p>
<p><em style="box-sizing: border-box; color: #1495d0; font-family: Overpass, sans-serif; font-size: 14.6667px; background-color: #fafbff;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I hope you will strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, and I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045.

It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

Please adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. <p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">Sample Public Comment: </p>
<p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state’s 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>
<p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration. </p>
<p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">Natural Gas is responsible for more Green House Gases than CO2 and it is creates more warming than CO2. Using it for any kind of a solution, is not a solution. Regenerative agriculture, composting and preservation of our intact forests can do amuch better job of sequestering Green House Gases.</p>
<p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">Thank you for taking these comments seriously and amending your scoping plan.</p>
<p style="box-sizing: border-box; margin: 0px 0px 1em;"><em style="box-sizing: border-box;">Deirdre Fennessy</p>

Subject: Please consider strengthening and improving the Draft Scoping Plan Update
Comment:

<em style="border: 1px solid black; padding: 5px;">I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<em style="border: 1px solid black; padding: 5px;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

<p> I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

Subject: Strengthening and modifying the Scoping Plan

Comment:

<p>It is significant that CA has outlined a serious plan to reach carbon neutrality by 2045. However, it could be more efficient and faster to be more optimistic about the prospects for renewable electricity generation and storage (so, phasing out oil and natural gas faster, and investing that money in renewable technology. It would also be advantageous to be less optimistic about carbon capture technologies, and modifying the carbon drawdown plans to rely more on better-proven methods like soil regeneration and cultivating carbon-intensive plant life.

</p>
<p>The reason for this selective optimism and pessimism is less about the probability of success (though this alternative investment strategy is certainly realistic) and more about mitigating the effects if a certain technology or social change doesn't pan out. If the current plan fails, say if carbon capture never effectively works, we have nothing to show for it. While if solar energy storage fails us, we will simply need to adopt less energy-intensive lifestyles.

</p>
<p>Thank you for your consideration. </p>

Subject: Please Strengthen the 2022 Climate Change Scoping Plan

Comment:

<p>The 2022 Scoping Plan for Climate Change needs to go farther and do more to protect California's future.</p>

<p>The state needs to invest more in renewables and storage. We shouldn't be expanding fossil fuels like natural gas, and spending millions on unproven technology like carbon capture. Reforestation, composting and soil regeneration are proven to reduce greenhouse gas emissions. Let's fund them instead. We must focus more on further reducing carbon emissions in transportation and housing.</p>

<p>California needs real change to meet the challenge of climate change. The steps to make these changes might seem scary, but they aren't as frightening as climate disaster.</p>

Subject: 2022 Scoping plan has some wrong ideas

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

Two parts in particular lead in the wrong direction of expanding use of fossil fuels. 1) Expanding LNG will lead to more CO2 by combustion, and more methane will be inevitably released. To say that LNG will fill the near-time energy gap, also carries with that these facilities will become stranded assets. 2) To plan that Direct Carbon Capture technology will be able to remove 110 MMT of CO2 by 2045 is wishful thinking with no present evidence to support it.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030, and doesn't plan to reach carbon neutrality earlier than 2045. It is insufficient to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must create a more ambitious Scoping Plan that accelerates the pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by

accelerating a phase-out of oil and gas extraction and oil refining; **not making any more investment in fossil fuel infrastructure;** **eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources;** **pursuing more robust transportation sector targets;** and **decarbonizing buildings.** Our climate crisis is intensifying rapidly, and demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration and for your service to the public.

Subject: On The Strengthening of the CARB standard

Comment:

`<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;">As a concerned citizen of these United States, I have my following concerns about the proposed CARB Draft Scoping plan. The chief of them are below:</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;"> </p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;">1.

 The draft plan does not demonstrate that California is on track to even meet the legally mandated goal of at least a 40% reduction in greenhouse gases by 2030.[2] Short-lived climate pollutants are particularly unlikely to achieve a 40% reduction.</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;">2.

 The draft plan does not follow AB 32's requirement that California achieve "the maximum technologically feasible" emission reductions, using the most cost-effective methods.[3] "Air board officials said they will propose the option that has the least impact on the economy rather than accelerating the pace of achieving carbon neutrality.[1]</p>
<div style="color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;"> </div>
<h5 style="color: #404040; font-family: Arial; background-color: #ffffff;">Scientific Issues</h5>
<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;">1.

 The draft plan will not keep global temperatures close to what scientists say will avoid catastrophe. The world has only ten years to cut greenhouse gas emissions by 50% if we are to attain the goal. President Biden has committed the United States to a 50% reduction by 2030. Yet the draft plan may not achieve even 40% by 2030.</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial; font-size: 14px; background-color: #ffffff;">2.

 The science of climate change requires front-loading our response. "If mitigation pathways are not rapidly activated, much more expensive and complex adaptation measures will have to be taken to avoid the impacts of higher levels of global warming on the Earth system.[4]</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;`

font-size: 14px; background-color: #ffffff;">3.
 California's goal should be at least an
80% reduction in emissions by 2030. [5]</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">4.
 The draft plan only aims for an 80% reduction
emissionsby 2045. [6]</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">5.
 Neither CCS nor DAC should be counted on as
scalable.The March 28,^{ }2022 IPCC
report on the capacity of different actions to reduce greenhouse
gases puts CCS as the least effective and most expensive of the 43
climate actions the IPCC evaluated for deployment prior to 2030.[7]</p>
<h5 style="color: #404040; font-family: Arial; background-color:
#ffffff;">Environmental Justice Problems</h5>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">1.
 The draft plan drags out elimination of
pollution that disproportionately affects poor people and people of
color. But rapid elimination of GHG pollution costs less than the
health costs of continuing pollution.<a style="color:
#222222;">[8]</sup></p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">2.
 The Environmental Justice Advisory Council
(EJAC), which advises the CARB Board, has demanded faster and more
comprehensive measures than in the draft plan so as to protect
disadvantaged communities, particularly those suffering from air
pollution.[9]</p>
<h5 style="color: #404040; font-family: Arial; background-color:
#ffffff;">Short-lived Climate Pollutants (SLCPs)</h5>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">1.
 The draft scoping plan recognizes the
importance of SLCP abatement but not the importance of moving very
quickly.[10]</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">2.
 Reduction of emissions from HFC refrigerants
having thousands of times more warming effect than carbon dioxide
must be greatly accelerated.<a style="color:
#222222;">[11]</p>
<p style="margin: 1em 0px; color: #505050; font-family: Arial;
font-size: 14px; background-color: #ffffff;">3.
 The draft plan expects to reduce
fugitive emissions of methane by 50%, but it needs to be higher in
California to keep global warming to no more than
1.5°C.<a style="color:
#222222;">[12]</p>
<h5 style="color: #404040; font-family: Arial; background-color:
#ffffff;">Cap and Trade</h5>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: You Need to Strengthen and Improve the Draft Scoping Plan Update.

Comment:

I'm sure it's useless to ask, but nonetheless I urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our very last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, and that is why I am disgusted to see that the Draft Scoping Plan refuses to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It simply <em style="color: #3498db; font-size: 14px;">is <em style="font-size: 14px; color: #3498db;">not good enough to meet the urgency of the climate crisis and the desperate need for bold action. CARB must, but I'm sure will refuse to, achieve a more ambitious Scoping Plan that could lead to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians could have lived and thrived in a cleaner and healthier environment.</p>

I strongly, though futilely, urge the California Air Resources Board to adopt a more ambitious plan for how our state will combat the most catastrophic impacts of global warming ("climate change") in the crucial years ahead. To accomplish this, CARB must (but won't!) improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining, not making any further investment in fossil fuel infrastructure, eliminating our reliance on unproven and costly technologies to prolong polluting fuel sources, pursuing more robust transportation sector targets, and decarbonizing buildings. The rapidly escalating climate crisis demands that CARB adopt a truly ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis we face.</p>

<span

style="line-height: 21px; font-size: 14px;">I would t hank you
for your consideration if I honestly believed that you would
consider this plea.</p>

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. As a physician who practiced for 36 yrs in San Francisco, I am alarmed at the health hazards that have resulted from climate change. As the IPCC stated we are now in a "Code Red for Humanity." Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: Scoping Plan

Comment:

<p>I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p> </p>

<p>I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration</p>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

<p>

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Comment:

I'm a retired mom and future grandparent writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have repeatedly told us that this decade is our last chance to make significant and meaningful changes in our infrastructure, including transportation, energy, building, and other components to prevent an irreversible climate catastrophe. I'm disappointed that the Draft Scoping Plan does not include accelerated targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. CARB must step up and meet the urgency of the climate crisis and our desperate need for bold actions. CARB must develop a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

The California Air Resources Board must adopt a more ambitious plan on how we will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. The residents of our state and future generations are depending on your bold, thoughtful action! Thank you for your consideration.</p>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Comment:

<p>hi, I am writing in support of a more ambitious draft scoping plan to achieve carbon neutrality sooner. perhaps something to reach 60% of 1990 emissions by 2030 to phase out fossil fuels sooner? thanks for the consideration!</p>

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

Comment:

<p>am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

<blockquote>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">We are running out of time on climate change. Our climate change plan therefore needs to be much stronger if we are to afford a decent future for our grandchildren. I urge you to strengthen and improve the Draft 2022 Scoping Plan update. This decade represents our last chance to make meaningful changes in transportation, energy, building, and other major infrastructure. The current Draft Scoping Plan compromises these changes to the level where California will not do enough to prevent an irreversible climate catastrophe. As a grandmother, I strongly urge you to do more. We NEED to achieve carbon neutrality by 2030.</p>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">Please, for the sake of our children and grandchildren, accelerate the phase-out of oil and gas extraction and oil refining. Put an end to any additional investment in fossil fuel infrastructure, redirect money that is targeted at prolonging current fossil fuel sources into improvements in transportation and building infrastructure that reduce, or better still, eliminate the need for such fuels. We need a stronger, more ambitious scoping plan if we are to ensure any kind of reasonable future for the next generations. Thank you for your consideration.</p>

</blockquote>

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; background-color: #ffffff; clear: both; margin: 0px 0px 12px; text-size-adjust: 100%; line-height: 24px;">I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update, which is way too weak as currently written. Drastic action, not timid steps, is needed. In fact, this draft is so timid, it doesn't even SOUND like it was written by Californians. California is in most ways on the leading edge of addressing transportation, energy, building and other major infrastructure changes to prevent irreversible climate catastrophe, which is one reason why this 2022 Draft Scoping Plan Update reads as though it has been hijacked by Big Business. I am really disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 and fails to achieve carbon neutrality before 2045. It is simply not good enough as currently written to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state’s 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment, not to mention stop having to live in fear of year-round wildfires, that we now know are an indirect result of the climate crisis.</p>

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; background-color: #ffffff; clear: both; margin: 0px 0px 12px; text-size-adjust: 100%; line-height: 24px;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how California will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure (and that includes stopping the construction of NEW gas stations); eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands

that CARB adopt a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: The Draft 2022 Climate Change Scoping Plan
Comment:

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; background-color: #ffffff; clear: both; margin: 0px 0px 12px; line-height: 24px;">Dear Board Members:</p>
<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; background-color: #ffffff; clear: both; margin: 0px 0px 12px; line-height: 24px;">I strongly urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Thousands of climate scientists have increasingly and loudly raised the alarm that only a few years remain for us to make significant and meaningful changes in our society, including transportation, energy, agriculture, building, and other major areas of industry and infrastructure to prevent an irreversible climate catastrophe. That is right - an irreversible climate catastrophe! With the stakes this high, I am very disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 (or earlier) or to achieve carbon neutrality no earlier than 2045. These targets are simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must put forward and achieve a more ambitious Scoping Plan that accelerates the pathway to carbon neutrality! This is required if we want the state's 40 million residents and future generations of Californians to live in and thrive in a cleaner and healthier environment. The window of opportunity is quickly closing!</p>
<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; background-color: #ffffff; clear: both; margin: 0px 0px 12px; line-height: 24px;">I strongly urge the California Air Resources Board to adopt a more ambitious plan for how our state will combat the most catastrophic impacts of climate change in the crucial few years ahead. To accomplish this, CARB must greatly improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; by not making any more investment in fossil fuel infrastructure; by eliminating or significantly reducing our reliance on unproven and costly technologies such as carbon capture to prolong polluting fuel sources; by pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that

CARB adopts a Scoping Plan in line with the urgency of our climate situation, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face within the next decade. Thank you for your consideration.

Most sincerely,

Ward Hinds MD,
MPH

Subject: Strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. We must make significant and meaningful changes to our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe. I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. The climate crisis requires urgent and bold actions. California Air Resources Board must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state’s 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Comment:

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Subject: Please improve the Draft Scoping Plan Update

Comment:

I am writing to urge you to strengthen the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our major infrastructure to prevent an irreversible climate catastrophe. I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the accelerating climate crisis. One need only monitor the current world-wide climate changes taking place today to realize the urgency. Previous timeline forecasts have all proven to be too optimistic.

I urge CARB to adopt a more ambitious plan by accelerating a phase-out of oil and gas extraction and oil refining; reducing or eliminating additional investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Subject: Draft Scoping Plan

Comment:

I am a person with asthma acquired from living in Los Angeles in the 50's and 60's before the EPA, when the sun rose like a red rubber ball through the pollution, and when they were using rocket fuel for testing Atlas rockets so close, my whole house shook. I would ride on my girlfriend's horse to Aliso Canyon and back before the 118 freeway was built. Now I am just getting over pneumonia, so I

urge you to strengthen and improve the Draft 2022 Scoping Plan Update to improve air quality. In addition, Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment. Scientists also indicate if we don't lower Greenhouse Gas emissions enough we could be facing up to a 50% extinction of all the species on earth from global warming. This is a horrifying thought and we could be among that 50%.

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.

Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p style="font-family: -apple-system, BlinkMacSystemFont, 'Helvetica Neue', 'Segoe UI', Arial, sans-serif, 'Apple Color Emoji', 'Segoe UI Emoji', 'Segoe UI Symbol'; margin: 0px 0px 12px; clear: both; text-size-adjust: 100%; line-height: 19.5px;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: Strengthen and improve the Draft Scoping Plan Update

Comment:

I strongly urge the California Air Resources Board to adopt a more ambitious plan for our state that will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings.

I also urge you to strengthen and improve the Draft 2022 Scoping Plan Update by accelerating the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality earlier than 2045.

Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face.

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update.
The window to prevent the worst impacts of the climate crisis is closing fast. The climate crisis is severe but it is not hopeless. Every bit of action counts. Please, please do whatever you can.
CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face.
Thank you for your work. It is so important that we work together to help our climate.

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

To Whom It May Concern,</p>

I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

SUBMIT A PUBLIC COMMENT

Time is of the essence, c. We are in the final few years that remain to tackle the climate crisis and create a more just and vibrant future for California.

Because it's a wide-ranging, multi-agency effort that touches all sectors of the state's economy and that agencies and legislators alike follow, the Scoping Plan is a critical document for California to make significant and meaningful changes in order to combat the climate crisis.

Right now, there are only a few hundred public comments up on [CARB's website](https://default.salsalabs.org/Td9b309d0-483d-4938-af5a-2620243922b1/0619f40e-394f-46f4-912a-bc8af550875b) from all of California. That means they read and value every single public comment — and that also means we can easily double that total!

[With the deadline for public comments coming up THIS FRIDAY, June 24, get yours in TODAY so the state knows where you stand on achieving carbon neutrality and solving the climate crisis.](https://default.salsalabs.org/T3937dff8-alf2-4c27-80ec-a91611a212f7/0619f40e-394f-46f4-912a-bc8af550875b)

Thanks for taking action on this critical issue.

create a roadmap for global action. To protect our air, land,
water, and future, we organize voters, elect and train candidates,
and hold lawmakers accountable for bold policy change. Our vision
is to solve the climate crisis, build resilient, connected, healthy
communities, and create a democracy and economy that is just and
sustainable for all.</span></p>

Form Letter 239 for Comment 274 for 2022 Climate Change Scoping Plan (scopingplan2022) - Non-Reg.

First Name: Narayan
Last Name: Gopinathan
Email Address: narayansgopi@gmail.com
Affiliation: UCLA

Subject: Strengthen Scoping Plan by accelerating ICE phaseout
Comment:

<p>Dear CARB,</p>
<p>As a young Californian, who studies climate change policies and solutions, I would strongly encourage you to accelerate the phaseout of combustion vehicle sales. We cannot afford to allow continued sales of gas cars through 2035. Every gas car sold will lock in dependency on fossil fuels, and create emissions for years if not decades after the sale. Any car sold in 2035 could be on the road for more than a decade, and so allowing sale of gas cars in 2035 will make it near impossible to meet our deadline of carbon neutrality by 2045.</p>
<p>Furthermore, allowing sale of gas cars will strengthen dictators like Putin and MBS, who thrive off of oil revenues. Every gas car sold harms our national security, by enabling dictators to profit from oil sales. </p>
<p>For that reason, we must move up our phaseout date to 2030, if not earlier. The state of Washington is phasing out sales of gas cars by 2030. We can do that too. We must pair a phaseout of gas cars with increased investment in EV charging infrastructure and public transportation, including regional rail and bus services, and expansion of light rail and metro services within our cities. </p>
<p>Best regards,</p>
<p>Narayan Gopinathan</p>

Subject: Please strengthen and improve the Draft Scoping Plan Update

Comment:

<blockquote>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">I am writing to urge you to strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<p style="clear: both; margin: 0 0 12px 0; line-height: 150%;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>

Subject: The 'Draft Scoping Plan Update' MUST Be Stronger!

Comment:

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; clear: both; margin: 0px 0px 12px; line-height: 24px;">Hello, I am writing today to urge you to vastly strengthen and improve the Draft 2022 Scoping Plan Update. Scientists have increasingly raised the alarm that RIGHT NOW is our last chance to make significant and meaningful changes in transportation, energy, building, and other major infrastructure to prevent irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan utterly fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030, or to achieve carbon neutrality no earlier than 2045. It is very simply not good enough to meet the urgency of the climate crisis and the undeniable need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that California's 40 million residents and future generations of Californians can live in, and thrive in, a cleaner and healthier environment.</p>

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; clear: both; margin: 0px 0px 12px; line-height: 24px;">PLEASE, I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a complete phase-out of oil and gas extraction and oil refining; NOT making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings now. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face.</p>

<p style="color: #222222; font-family: Arial, Helvetica, sans-serif; font-size: 16px; clear: both; margin: 0px 0px 12px; line-height: 24px;">Thank you for your time, work, and consideration. Please do not fail us now.</p>

Scientists have increasingly raised the alarm that this decade is our last chance to make significant and meaningful changes in our transportation, energy, building, and other major infrastructure to prevent an irreversible climate catastrophe, which is why I am disappointed that the Draft Scoping Plan fails to accelerate the targets to reduce greenhouse gas emissions to 40% below 1990 levels by 2030 or to achieve carbon neutrality no earlier than 2045. It is simply not good enough to meet the urgency of the climate crisis and the desperate need for bold actions. CARB must achieve a more ambitious Scoping Plan that leads to an accelerated pathway to carbon neutrality so that the state's 40 million residents and future generations of Californians can live in and thrive in a cleaner and healthier environment.</p>

<em style="box-sizing: content-box; line-height: normal;">I strongly urge the California Air Resources Board to adopt a more ambitious plan on how our state will combat the most catastrophic impacts of climate change in the crucial years ahead. To accomplish this, CARB must improve the Draft Scoping Plan by accelerating a phase-out of oil and gas extraction and oil refining; not making any more investment in fossil fuel infrastructure; eliminating or significantly reducing our reliance on unproven and costly technologies to prolong polluting fuel sources; pursuing more robust transportation sector targets; and decarbonizing buildings. The escalating climate crisis demands that CARB adopts a more ambitious Scoping Plan, one with the vision and conviction to provide the solutions that are needed to overcome the crisis that we face. Thank you for your consideration.</p>
