Subject: Letter to California Air Resources Board (CARB) Regarding Amazon Oil
Comment:

```
<p>It has come to my attention <span style="background-color:
#ffffff; color: #333333; font-family: Helvetica, Arial, sans-serif;
font-size: 16px;">that California consumes nearly 50% of all oil
exports from the Amazon globally (nearly 1 in 9 gallons pumped
in-state on average).</span></p>
<p><span style="background-color: #ffffff; color: #333333;
font-family: Helvetica, Arial, sans-serif; font-size: 16px;">It is
my position that&amp;nbsp;</span><span style="background-color:
#ffffff; color: #333333; font-family: Helvetica, Arial, sans-serif;
font-size: 16px;">the state of California should not be complicit
in driving new oil drilling in the Amazon.</span></p>
<p><span style="color: #333333; font-family: Helvetica, Arial,
sans-serif; font-size: 16px; background-color: #ffffff;">I call on
CARB to require California refineries to ensure that they are not
sourcing crude oil from regions where such sourcing will result in
human rights violations, and I call on CARB to require refineries
to ensure that they will not source crude from areas of new
drilling in the Amazon.</span></p>
<p><span style="background-color: #ffffff; color: #333333;
font-family: Helvetica, Arial, sans-serif; font-size: 16px;">Thank
you.</span></p>
```

Comment:

```
<p>I am very concerned about California consuming 50% of all oil
exports from Amazon. CARB shoud reglate refineries's crude sources
and volumes from Amazon. CARB should require California refineries
to ensure that they are not sourcing crude oil from regions where
there are human rights violations and to requre refineries to
ensure that they will not source crude from areas of new drilling
in Amazon.</p>
<p>Thank You.</p>

Subject: Amazon Oil Exports
Comment:

```
<p style="box-sizing: border-box; margin: 1em 0px; outline: 0px;
color: #636161; font-family: Montserrat, sans-serif; font-size:
16px; background-color: #ffffff;">I am concerned that California
consumes nearly 50% of all oil exports from the Amazon globally
(nearly 1 in 9 gallons pumped in-state on average). California Air
Resources Board (CARB), I don&rsquo;t want to be complicit in
driving new oil drilling in the Amazon. There is a need for
regulating refineries&rsquo; crude sources and volumes. Require
California refineries to ensure that they are not sourcing crude
oil from regions where there are human rights violations.
Additionally, require refineries to ensure that they will not
source crude from areas of new drilling in the Amazon.</p>
<p style="box-sizing: border-box; margin: 1em 0px; outline: 0px;

Subject: Crude Oil Imports From the Amazon
Comment:

```
<p style="box-sizing: border-box; margin: 1em 0px; outline: 0px;
color: #636161; font-family: Montserrat, sans-serif; font-size:
16px; background-color: #ffffff;">I'm very concerned that
California consumes nearly 50% of all oil exports from the Amazon
globally (nearly 1 in 9 gallons pumped in-state on average). Commit
California to a policy/regulatory agenda that ensures that
California refineries are not sourcing crude from regions where
there are Indigenous rights violations or from regions where new
oil drilling in the Amazon is being planned.</p>
<p style="box-sizing: border-box; margin: 1em 0px; color: #636161;
font-family: Montserrat, sans-serif; font-size: 16px;
background-color: #ffffff;">I do not want California to be
complicit in driving new oil drilling in the Amazon which requires
regulating refineries&rsquo; crude sources and volumes. Please
develop a plan for California to reduce and/or eliminate its
consumption of crude from the Amazon and require California
refineries to ensure that they are not sourcing crude oil from
regions where there are human rights violations and to require that
they ensure that they will not source crude from areas of new
drilling in the Amazon.</p>
<p style="box-sizing: border-box; margin: 1em 0px; color: #636161;
font-family: Montserrat, sans-serif; font-size: 16px;
background-color: #ffffff;">Finally, committing California to new
fuel efficiency standards and expanding the use of electric
vehicles in the state's fleet will help reduce our consumption
equal to Amazon oil import totals.</p>
```
