Subject: Reduce emissions
Comment:

I urge the California Air Resources Board to adopt a strong plan to combat global warming in California and to set the standard for national and international action. I also urge the state air board to include a stronger focus on measures to reduce emissions from driving that contribute the largest percentage of greenhouse gases in California. The plan should include a much more aggressive statewide goal for reducing vehicle trips and measures to promote progressive action by local governments. The plan should also include a strong goal and additional regulatory measures for reducing pollution from industrial sources such as petroleum refineries and cement manufacturing facilities.
