Subject: mandatory deadline surplus

Comment:

The proposed mandatory deadline surplus of three years would disallow any funding for vehicles older than 1998.

These are the most polluting mobile sources.

Please amend to two years (same as owner operators) so that we have time to replace the most polluting elements while causing the least economic disruption.

As an aside, the new Carl Moyer Fleet Modernization Plan will also be entirely useless.

Subject: mandatory compliance surplus time window

Comment:

The most polluting category of diesel trucks is pre 1998.

The compliance date for these trucks is 12/31/2010.

The proposed surplus window is three years.

This would render this entire category of trucks ineligible for grant assistance.

It would also insure that these vehicles would continue to pollute up to the Compliance Date.

If the surplus window was reduced to 1.5 years for fleets and 1 year for owner operators we would be able to replace the heaviest polluting engines as quickly as possible with the least detrimental economic impact on the trucking community.

Mary Nichols, Chair
Air Resources Board
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Re: Proposition 1B Goods Movement Emission Reduction Program

Dear Ms. Nichols:

I was pleased when the Governor declared his unhappiness last year with the proposed 2024 attainment date for the 24-hour ozone standard in the San Joaquin Valley. I was pleased when you and your colleagues on the board declared last November that, while 2024 may be the legally approvable date, you believed 2017 to be the proper target date for attainment and that CARB would commit its weight to the achievement of that goal. Unfortunately, the CARB staff recommendations for target corridor allocations under the Goods Movement Emission Reduction Program (GMERP) show no evidence of this commitment.

As you know, mobile sources are by far the largest contributor to the Valley's Ozone problems, representing about 85% of ozone emissions, with goods movement emissions being the largest single source. The September 19 Staff Draft Concepts for Implementation states that "trucks are the dominant source of health risk from goods movement in most impacted communities." The staff recommendations on funding targets by source category accordingly allocate 76% of the bond monies to truck retrofits and replacements. CARB EMFAC data shows there is more truck VMT in the San

Joaquin Valley than in any of the other major trade corridors. Indeed, 45% of the truck VMT occurs in the Valley, while the next highest number is 35% in the South Coast. Yet your staff recommends that 55% of the funding be allocated to the South Coast, while only 25% is allocated to the Central Valley, to be shared between the San Joaquin Valley and the Sacramento non-attainment zone.

I recognize the complexity of coming up with a fair and equitable allocation method, but the staff recommendations are so far from being remotely fair as to require your personal intervention. I am not proposing different allocation criteria than those selected by your staff, but I am respectfully requesting that they be applied and weighted properly.

* The emissions reductions needed to bring the Valley into attainment of the 24-hour ozone standard by 2017 must be included in the calculation under the ?SIP Needs? criteria. The San Joaquin Valley is the only trade corridor that has a target date for 24-hr ozone attainment within the time horizon of the bond measure. It may not be a legally binding commitment, but it is our hope that the CARB board was sincere in stating its intention to lend its weight to the 2017 target date.

* The ?Goods Movement Emissions? criterion should be applied based on the latest official inventory numbers ? those that CARB has asked the air districts to use for their SIP plans ? not some new inventory numbers that have been subjected to no public vetting process and that appear, at first glance, to be seriously flawed.

* Population figures should be normalized using per capita exposure to goods movement emissions. There is nothing in the bond measure nor in the implementing statute that suggests that raw population numbers are a fair basis for this allocation. Chapter 3.2, Section (b) (1) states that that CARB should give ??priority to emission reduction projects that achieve the earliest possible reduction of health risk in communities with the highest health risks from goods movement facilities.? Certainly the port areas meet this criterion, but so do the residents of the Valley, 71% of whom reside within five miles of Highway 99 or Interstate 5, with those in the lowest

socio-economic groups living in closest proximity to these heavily trafficked good movement corridors.

Calculations made by the San Joaquin Valley Air Pollution Control District show that when these considerations are applied to the allocation criteria chosen by the CARB staff, the Valley is deserving of a minimum allocation of 37% of the bond funds. While CARB staff has indicated that "the San Joaquin Valley with high through-truck and rail traffic will benefit from projects administered by agencies in other corridors," there is no guarantee of that in the guidelines proposed by staff. I respectfully request that the target allocations be adjusted to assure the Central Valley a minimum allocation of 37% of the bond funds.

Thank you for your consideration of our concerns.

Sincerely,
Teresa Flores

First Name: Francene

Last Name: Lifson

Email Address: ryu@aafa-ca.org

Affiliation: Asthma & Allergy Foundation of America

Subject: Prop 1B funding guidelines

Comment:

Dear Ms. Nichols:

On behalf of the Asthma & Allergy Foundation of America-California Chapter (AAFA-CA), we would first like to commend CARB for their efforts in reducing harmful emissions. We represent the 4.5 million Californians that have been diagnosed with asthma and are thus, very concerned about the Proposition 1B Goods Movement Emission Reduction Program funding guidelines that are scheduled for adoption on February 28th, 2008 at your Board meeting. We understand that these guidelines will determine the share of funding received by each trade corridor region in the state.

AAFA-CA represents the entire state, however, we would like to ensure that the region which has the largest population of Californians exposed to the most unhealthy air in the nation, receives its fair share of the \$1 Billion approved by voters to mitigate air quality impacts.

The CARB staff has proposed that 55% of the total amount of \$1 billion Proposition 1B funds for air quality mitigation be allocated to the Los Angeles/Inland Empire transportation corridor. Air pollution has repeatedly caused both Los Angeles and the Inland Empire to be at, or near, the bottom of many air quality ratings. In 2004, the EPA rated the San Bernardino-Riverside area as having the worst particulate air pollution in the United States. The allocations of funds for this region should be based on the severity of air pollution and the number of people impacted, or in technical terms, population weighted exposure to criteria air pollutants above federal standards for Particulate matter (PM 2.5) and Ozone. Furthermore, as shown in the attachment, detailed analysis of the PM2.5 and 8-hour ozone exposure for the South Coast air basin shows that this region bears a full 89% of the population weighted incremental PM2.5 exposure above federal annual standard on a statewide basis. For 8-hour ozone exposure above the federal standard this figure is 74% on a statewide basis.

Based on this information, we believe that up to 80% of the Prop 1B funds should be allocated to Southern California in order to meet the air quality needs of the people living here. Any allocation lower than the originally proposed 55% to the Los Angeles/ Inland Empire region would not be fair to the people living in this region. We appreciate your attention to this important issue and urge your Board to provide equitable funding to mitigate air quality impacts for Southern California residents.

Sincerely,

Francene Lifson, Executive Director
Representing Volunteers and Staff

Subject: Item 08-2-7 / Support Staff Recommendations re: Prop 1B (L.A. Area Chamber of Commerce)

Comment:

February 27th 2008

Attn: Clerk of the Board

Chairwoman Mary Nichols
California Air Resources Board
1001 I Street
Sacramento, CA 95814

Re: Support staff recommendations for Item 08-2-7

On behalf of the Los Angeles Area Chamber of Commerce, I write in support of the CARB staff recommendation to allocate 55% of the Proposition 1B air emission reduction program funds to the L.A./Inland Empire Trade Corridor. The Chamber recognizes the hard work and countless hours that CARB staff put into developing a fair and justified allocation of limited resources.

Goods movement in the Los Angeles region dwarfs that of any other trade corridor. However, significant investment is needed to off-set the emissions caused by this considerable growth and activity. Therefore, the Chamber supports allocating a proportionally larger share of Prop. 1B funds to the LA/Inland Empire Trade Corridor.

As one of our fastest growing job sectors, the logistics industry represents an economic boon to Southern California. Los Angeles and Inland Empire are working hard as a region to meet the challenges presented by growth and have committed local funds to replace outdated equipment and improve infrastructure.

The Chamber thanks CARB for recognizing our immense challenge and for its vital support in helping our region succeed in meeting clean air goals. We as an organization commit to continually working with staff to improve emissions reductions while achieving economic prosperity.

Sincerely,

Gary Toebben
President and CEO
Los Angeles Area Chamber of Commerce
