Comment:

Dear CARB Staff;  
My views of California communities needing monitoring are based largely on atmospheric pollution by fossil fuel burning, refining, extraction and transportation.  
Bay Area wide, the emissions from jet aircraft utilizing our three major airports suffer the effects of profound levels of emission from jet aircraft takeoffs. The most concentrated emissions are on takeoff into initial lower elevations at or above: San Bruno, Oakland, South San Francisco, Brisbane, San Francisco, (including Treasure Island), San Leandro, Alameda, San Lorenzo, Castro Valley, Santa Clara, Milpitas, San Jose, Newark, Fremont and other communities in the takeoff flight paths qualify. Communities adjacent to military bases qualify. As to refineries; I am sure you have a complete list, I might suggest adding Concord, Pacheco, Pittsburg, Antioch, El Cerrito; As to California generally, communities in proximity to 12 natural gas extraction fields and facilities have been subject to methane emissions.  
Thank You for the opportunity to comment,

Bill Mayben

Comment:

Please include Reseda Ranch because of the back yards of many residential properties here which are being used for commercial purposes, housing many large diesel trucks through ingress and egress, picking up produced goods, running idle, being serviced with large compressors running for tire repair, pressure-washer engines running for prolonged periods of time. This has blanketed the air with engine fumes which give me a stomach ache, and make me try to seek cleaner air indoors so that I can breathe. This can take place every day of the week, including Holidays, morning, noon & night. Dept. of Building & Safety pretend to respond, but don't really do anything--they don't want to get involved. Thank you.

Subject: Comment on Community Air Protection Program Staff Report

Comment:

I am writing in support of the Community Air Protection Program Recommendation Report submitted by CARB staff 11/2020 to include the Arvin and Lamont community. It is imperative these communities receive the funding available not only for the community air monitoring program but also emission reduction. I currently work on contract with the City of Arvin and see first hand the consequences of decades of disinvestment and poor air and water quality. It is imperative CARB votes in favor of Arvin and Lamont.

Subject: Public Comment for AB 617

Comment:

Hello, I am Natalia Balderas a senior at skyline highschool and the Rose Foundations New Voices Are Rising Climate Resilience fellow for this year. I have the privilege to live near the Skyline hills. Surrounded by the beauty of the trees and nature, the tree guarded freeway, and most importantly, clean water, access to healthy food, and clean air. Yet when I drive down the hill I can feel the air become worse and worse as I drive further into East Oakland. I can't help but think of my best friend and her family who live in East Oakland, her, her mom, her grandma, and her niece all have asthma and everyday it's a struggle to breathe. We keep preaching to the choir how POC and low income communities deserve better, yet no one ever actually does it and continues to disappoint those communities in need. We all need to start doing better and start making real change for these communities. And that change can start here, by making East Oakland an AB 617 community. Thank you

Comment:

I am against the extention for ag burning becuae it is an immense health risk, not only for my families, but the rest of my neighbors, especially the children who have developed lung problems. For example my younger brother now I developing symptoms of asthma, which makes it harder for him to go outside, even more when ag burning is occurring. Unable to enjoy the open fresh air because particles of as floating about. I would greatly appreciate it that ag burning would not be extended. Thank you.
