

Comment 1 for High-Global Warming Potential Refrigerant Emissions Reductions Regulation (casnap) - 45 Day.

First Name: Harshad

Last Name: Inamdar

Email Address: Harshad.Inamdar@rheem.com

Affiliation: Rheem Manufacturing

Subject: Recordkeeping requirements on OEM

Comment:

As an OEM, the vast majority of our sales in refrigeration equipment aimed at the end-uses regulated by this proposed rulemaking are direct to a Walk-in Box Manufacturer or a Wholesaler.

The OEM typically has no visibility as to the installation location, the end use application or whether the equipment will be used as a service replacement or in a new installation. Since we are not involved in the installation we also have no knowledge of the amount or type of refrigerant used.

cf.

Section 95375. Requirements

(c) Disclosure and Recordkeeping for Refrigeration End-Use Categories.

(2) Recordkeeping.

(F) The refrigerant and full charge capacity of the equipment.

---The requirement on the OEM to record and maintain current records about the type of refrigerant charged to the system and the full quantity of respective refrigerant charge in the equipment may not be possible to fulfil.

Could CARB issue clarification about these recordkeeping requirements?
