Comment:

This is Part 2 of Comments. Part 1 was written on April 25, 2014 and submitted both for Comment 29 For Draft Proposed First Update To The Climate Change Scoping Plan and to The Draft Environmental Analysis Prepared For Proposed First Update To The Climate Change Scoping Plan ... Today is Monday April 28,2014

T^he Environmental Analysis is Illegal and not a sick bird rather a bird...

Solar Energy makes the wind blow the water flow and the plants grow . It is the engine of our ecosystem. It's the way things work.

Solar systems have becomje life cycle cost effective as the costs of systems and interest rates have declined in recent years.

CARB approved on Dec 25,2012 the SCAQMD South Coast Air Quality Management Districts December 2012 Air Quality Management Plan . This is illegal and fattening. Both SCD and CARB asw2ell as San Juaquine District and the Bay Area District as well as the rest of the State must by cinvwerted to ImmediTE tOTAL SOLAR eNERGY BY 2020 AS SOON AS POSSIBLE. WE (THE REGAL WE) HAVE BEEN IN TOUCH WITH epa AND WILL OPPOSE THE 2012 sip ANDSdISTRICTS pLANS tHAT ARE NOT iMMEDIATE tOTAL SOLAR CONVERSION pLANS & iMMPLEMENTATIONS.

In the State of CA Supreme Court Caseof SCAQMD v Coatins Association of 2012 the SCD won and established that BARCT Best Avialble Retrofit Control Techn0ology is a technology forcing law and while solar is life cycle cost efficitave now it will be more so by 2020 and must be required to be retrofit ed now for buildioing and for processes as well as electric vehicles in the state.

While the current peak electricity load is apx. 60 GW Gigawatts a total of 180 GW Gigawatte peak will be needed to convwert to solar electric vehicles and hydrogen electric either fuel cells electrolisis ofwater to hydrogen orhydrogen directly which work at from 50-80% efficiency and can store solar energy daily weekly months seasonally or fpor years .

CPUC ordering plus 1 GW of Storage is a modest start but we willneed apxc 180 GW Hours plus toconvert CA.

AB32 and othewr parts of CAlaw require CARB etc to convert to Solar Renewables ASAP by 2020. The law sssays thou shalt implement the best technology that is possible that is cost effective whivch solar is. Incorpoprated herein by reference is State Health and safety code 3800 as well as 40404.5 and 40405 and40406 ie as SCD Solar conversion (immediate) and implementation plan as well as other District and the CA

SI{P StateImplimentation Plan. Distreicts use low nox burners as BACT etc to can use Solar as BACT BACT etc now. Do it already.

US DOE Department of Energy Sunshot will have solar e; lectricity at 5 cents per KWH by 2020 noquestion do itnow...

ITSC using CHP Combined Solar Heatand Colling (absorbtion chillers district heatingand cooling and pv and thermas systems or hybrids are cost effective now (also rember CA Supremes Tech Forcing Colar 5cents by 2020.

PG&E went bankrupt and Comissioner Florio told me that Senator Pro Tem John Burton put together a deal what the state would buy out their T &

D transssssssssssition and distribution system for \$1 but even thought this was a go with a republican governor and was gpo for a few weeks it fvell thought. But they are going BK Gin when the share holders have topay for a minimun fof 250,00 0 year of storage of nuclear waste as well as bankkruptcy for SCE and SDG&E and Sempra Dirty Gas is 80-100 plus temmmmmmmes the GWP global warming potential impact compared to CIO2 must6 896dirty gas care and asall heat etd,.etc,. more to come ...
