Subject: AB32

Comment:

To who it may concern.

I would like to share my feelings with you about the effects of AB32 on my small business and my family.

We have 3 dump trucks working in the construction trade.

The newest one is a 1991.

These 3 trucks support 4 families. Three drivers families and our family.

The construction trade works only a partial year as Winter shuts us down and county grading work is excluded from Oct 15 through April 15 so our window of opportunity to make money is small.

We are not like big companies that haul year round, who put on high miles and re-power every few years regardless of AB32 as their trucks are worn out.

The new requirements cannot be met financially with the income that is generated, even with partial grant money.

Three new trucks for our company would be a dream, but it's that, just a dream.

AB32 on the other hand is a real live nightmare for my family and 3 others.

For the first time in my life I truly understand the meaning of being distraught.

I have no solution to this problem. The money simply is not there to comply with AB32

I have worked hard in this business, 33 years now and with the high cost of doing business it has been a difficult to keep us in the black and everyone paid.

Now AB 32 looks like it could put an end to our 33 years of hard work.

I am a single full time parent to twin 14 yo. kids with no other means of support.

I'm sure they would like to go to college. But we cannot afford to even stay in business if AB32 prevails.

How can this be done to 4 families?

How can anyone justify taking our only means of support?

I rarely ask for help. I never need assistance. I have yet to fail my family.

But now I really don't know what to do.

For every letter you receive there are probably thousands of people just like us that you don't hear from but are in the same situation.

Put yourself in our shoes. What if everything you worked for was taken away.

The very ability to support your family.

Think about it.

Does anyone even care?

Chris, Chase and Chelsea Wortman

Subject: Comments on Proposed GHG Phase I Regulations

Comment:

Dear Honorable Board Members,

Kings Oil Tools (KOT) is struggling with the proposed GHG regulation. KOT has 31 trucks in its fleet. Since 2008, KOT has upgraded 70% of its 31 truck fleet at a cost of approximately 2.48 million dollars. In addition, KOT has invested about 4.3 million dollars upgrading its off-road fleet. All of this capital was invested in an effort to comply with the Truck Regs and the Off-Road Regs. KOT is a small part of the total oilfield service industry with a total fleet of over 3,000 on-road vehicles operating in California.

KOT and the oilfield service industry is with complying with the requirements of the Truck Regs as well as with the requirements of the Off-Road Regs and the Portable Equipment Registration Program. All of these regulations require the installation of PM filters and the replacement of engines to the 2010 standard or a Tier 4 standard for off-road engines. This is an enormous capital investment by the stakeholders in the oilfield service industry. This kind of cash drain will impact the economics in the California oil industry and could cost jobs.

Lastly, it should be noted that in 2011 there were approximately 250 businesses that left California and now (2013) there have been 158 businesses leave California due to regulations. In fact Intel and McAfee will be leaving California this December due to regulations.

We need to slow down on regulation development and see what the net result will be on our current emission reductions.

Sincerely,

Jim Zaben

Environmental Manager
Kings Oil Tools
