Subject: enhanced Nature Based Direct Air Capture (eDAC) for Carbon Neutrality
Comment:

I would like to send a slide presentation made at 2025 American Institute of Chemical Engineers and at the 2024 American Society of Agronomy regarding eDAC versus other forms of Direct Air Capture such as absorbent based DAC or aDAC and the impact of these forms of DAC to the agricultural economy, especially in Kern County California, the crown jewel of the California Ag economy. Please provide a name from CARB and an email address. I sent this to Mr. Moreno of CARB and also to CARB Secretary Karen Ross and Director OFA SAP Tawny Mata who encouraged me to address this with CARB directly, per comments made at the last CARB OFA SAP meeting.
