Re: OHRV 2013 - Proposed Regulation Order -Off-Highway Recreational Vehicles: Evaporative Emission Control, Title 13, California Code of Regulations - July 24 Public Comment and July 25 Hearing

Dear California Air Resources Board:

As a small business owner, OHV recreation professional, and member of the OHV user community, I am deeply concerned about the potential negative impacts of the proposed regulation order for Off-Highway Recreational Vehicles (OHRV): Evaporative Emission Control, Title 13, California Code of Regulations (Order). As you know, OHRV refers to off-road motorcycles, all-terrain vehicles, off-road sport vehicles, off-road utility vehicles, and sand cars. The Order will impact the production of said vehicles starting in 2018.

I just became aware of the Order two days ago after receiving a call from a concerned member of the OHV community. Due to a large number of other OHV-related projects on my desk and the late notice, I will not be able to produce a detailed analysis of the Order for the July 24 comment period deadline nor attend the July 25 hearing.

Since this proposed Order could have a significant impact on OHV recreation and related businesses, I contacted the California State Park Off-Highway Motor Vehicle Recreation Division (Division) after learning about the proposed Order to see if they had given any input into the proposal. Division stated they just found out about this proposed Order on Monday, July 15 and had not been consulted by CARB, a sister agency.

Here are my initial concerns about the proposed Order which are hereby submitted in time to meet the July 24 public comment period deadline.

Impacts to Competition (Red Sticker) Off-Road Motorcycles
Impacts to "Red Sticker" Riding Seasons
Impacts to Competition Events Including Amateur Events
Drastic Increase in Cost of Production (all OHRVs)
Reduction or Elimination of Certain Lines of OHRVs/Loss of Consumer Choice
Fiscal Impacts to OHRV Dealerships
Failure to Consult with Division
Fiscal Impact to Local Economies
Questionable Staff Analysis of Economic Impact to OHRV Recreation
Questionable Staff Analysis of Environmental Benefit
Over Optimistic View of Future OHMVR Sales

Based on my aforementioned concerns, I respectfully request the following:

Postpone Order/Rule and extend the public comment period until CARB consults with Division scientists and resource professionals to "ground-truth" CARB staff assumptions related to projected OHRV sales or usage, economic impacts to OHV-related businesses, impacts to competition events, impacts to red sticker riding seasons or usage, or environmental benefits of the rule.

Thanks in advance for your consideration of this request.

Don

Subject: Proposed new permeability regulations for OHV

Comment:

This is very short notice for this important regulation. I would appreciate a little more time to go over these proposed regulations before opining in. I am in support of the notion of such regulations but, simply put, this is too short a fuse.

Best regards,

Ross H. Liberty

President, Factory Pipe LLC

OEM exhaust supplier to the motorsports industry.

Subject: OPEI Comments to Proposed Regulation Order and Test Procedure for EVAP Emissions
Comment:

The Outdoor Power Equipment Institute (OPEI) is pleased to provide comments on ARB's May 2013 proposed regulation order and test procedure for determining evaporative emissions from OHRV's. Please see the comments dated 23Jul13 in the proposed regulation and test procedure immediately following this letter.

 Draft Regulations, see section/subsection: (d)(4), (d)(8) and (h)(7)

 TP‐933 Test Procedure, see section/subsection: 1.1.9, 2, 6.4.2.5

In addition to the July 25, 2013 workshop, OPEI and representatives of member companies are available to discuss these comments with the ARB at your convenience.

Thank you for the opportunity to review and provide input.

Kind regards,

Greg Knott
Director Industry Affairs
Outdoor Power Equipment Institute

Subject: Emissions Estimation Methodology for OHV

Comment:

There are a few questions that must be answered to establish the importance of this emissions action.

Frist, DMV registrations have been increased due to the a new law that allows DMV to garnish wages and place liens on outstanding unregistered OHVs.

Second, The new fuels in California with 10% Ethonal have been causing issues with fuel tank swelling. Thus, more evaporation?

Next, The study neglected the fact that manufactures recommends to drain complete fuel system prior to storage. This helps to reduce contamination of the fuel residue during storage.

Next, Standard deviation was not recorded or documented. Witch shows the accuracy of the test results, graphs, charts, estimations, etc.

Subject: off-road vehicles Regulations

Comment:

My only objection is to any proposed Regulations or Standards that exceed the Original Manufactured Exhaust performance of any Off Road or farm vehicle or product after such extended use. Ex. a dirt bike produced in 1970 and is still operating after 200,000 miles should only be judged on its orig. performance plus the expected reduction in performance common with that mileage. Using only the Level Highest expected Exhaust readings as a standard. To do otherwise is Dishonest! Invites cheaters.
