Comment 2 for Update to the Senate Bill 375 Greenhouse Gas Emission Reduction Targets and Environmental Analysis (sb375update2017) - Non-Reg.

First Name: Lisa
Last Name: Zorn
Email Address: lzorn@mtc.ca.gov
Affiliation: MTC

Subject: Staff Report for Proposed Update to SB 375 targets - Table 2
Comment:

Hi Nicole and Lezlie --

We have a quick initial comment for the Table 2 in the staff report, which summarizes the quantitative results for different strategy types in terms of their effects of reducing GHG emissions beyond the current SCS.

As you know, our current SCS is wrapping up, so for our stress test memo to ARB from March 6 of this year (<https://mtcdrive.app.box.com/file/143895568603>), we used our Big Cities Scenario, which included more aggressive Land Use and Transit policies compared to the current plan. In that memo, we also discussed testing pricing and the effects of a per mile VMT fee.

Based on this, we think a couple of values are omitted from Table 2 in the staff report, and we request they be included as follows. (The table footnotes are just for your info and our notes.)

Since this table is replicated in Slide 10 in the workshop slide deck, would it be possible to make this updates to the slides before tomorrow's workshop at MTC? (https://www.arb.ca.gov/cc/sb375/sb375_workshop_presentation_san_francisco.pdf)

Thank you!
-Lisa

Subject: Comments on SB 375 Targets for Southern California

Comment:

Attached please find a comment letter from the Public Health Alliance of Southern California in support of ARB's staff recommendation for GHG targets. Our comments are summarized below.

The Public Health Alliance of Southern California (Alliance) is a coalition of nine health departments in Southern California. Our departments are collectively responsible for the health of over 60% of California's population. We write this comment letter to support the Air Resources Board (ARB) staff recommendation for greenhouse gas emission reduction targets for MPOs in our region, specifically because these targets will:

- Reduce congestion and vehicle miles traveled (VMT), which will improve public health and address health inequities in our region, especially in our most disadvantaged communities
- Encourage a shift to more sustainable transportation modes including walking and bicycling, which will have important health and equity benefits
- Better align our regional GHG targets with the State's GHG targets identified in the Scoping Plan, and set a clear and ambitious VMT reduction targets in both policies
- Encourage use of new financial resources, including the recently-passed Senate Bill 1, Measure M and Volkswagen settlement, along with the Greenhouse Gas Reduction Fund, on projects that will reduce greenhouse gas emissions and improve health.

Comment:

Your proposal was good except a ban on fossil fuel extraction is needed and people need free vitamins to be healthy enough to use bicycling and active transportation. Parks should be used for commuters to camp overnight instead of commute home.

Comment:

Thank you for all your hard work and dedication to implement SB 375. We are grateful for the leadership ARB continues to provide and look forward to working with you to set ambitious and achievable targets.

After reviewing SACOG's target recommendations, we believe that more can be done to maximize our greenhouse gas emission reductions and achieve the goals of SB 375 to create healthy, equitable communities.

Please review our attached comments where we have outlined our concerns—and recommendations—for SACOG's 2035 target.

Sincerely,
Christopher Escarcega

Subject: California will cause non-compliance of other states

Comment:

Construction of the High Speed Rail (HSR) will admit particulate pollution. Sand mining for cement for the HSR may possibly release sulfur pollution. Cement companies will release green house gas emissions and VOC's from cement manufacturing. The sand mines may release sulfur and silica. We need clean air to do active transportation like bicycling. Some of the pollution previously mentioned will blow into other states. California should not cause other states to be in non-compliance.
