Subject: Increase Focus on Battery EVs over Fuel Cell Vehicles

Comment:

As a long-time California resident I'm proud of the work CARB has done to promote zero emission vehicles in the state and, in many respects, nationwide.

As part of Senate Bill 498 I am formally requesting that CARB significantly decrease, or altogether eliminate, subsidies towards fuel-cell vehicles programs. The reality of technology progress and the will of the people (as expressed by sales numbers) is now incontrovertible -- consumers want electric vehicles, not fuel cell vehicles. EVs have clearly come of age with effective fast-charge networks, long-lasting batteries, rapid battery improvements, and affordable prices all now in place. It is time for state financial support of fuel cell technologies to be stepped down, and for a unified push to be made for EVs at scale, to rid our state (and nation) of dependence on fossil fuels.

With regards,

Matt Fishbach

Subject: Needed changes in Senate Bill 498, perspective from particip

Comment:

Re: Replace Your Ride

Dealerships are gouging buyers and so reducing participation.

Buyers end up paying more taxes which further reduces demand.

CARB could buy (Fiat 500e's) directly from auctions for the same amount (\$4500) as the current maximum rebate and allow participants to pay much less, and at the same time sell twice as many EV's. This could be advertised on billboards, i.e.:

"(3 year old) Fiat 500e EV low miles, \$2500 to low income qualified buyers to replace older cars."

Leases should not be restricted. I was low income and was not allowed to do a lease which made it much more difficult to also get the Federal EV Tax credit via a lease. This unfairly cost me more money but did not prevent me from getting the same Replace Your Ride rebate I qualified for.

Also please repeal the regressive EV \$100 registration tax, and increase the gasoline and diesel tax to help fund more EV adoption and reduce pollution.

Subject: Please allow Hyundai Ioniq Hybrid and Waze carpooling
Comment:

Hey there,

I drive a Hyundai Ioniq Hybrid (not the plugin hybrid). It gets me around 50-60 mpg. It is not showing on the current list of permitted vehicles, even though the mpg is very similar and slightly better than the plugin version (because it is lighter I believe it gets 1 more mile per gallon on city traffic). It is rated at 57-59 (city-freeway).

Furthermore, I offer rides to carpoolers with the Google Waze app. I routinely have 2 or 3 regulars on my carpool. However, there is a section of freeway traffic in my way, which often is congested (between San Diego Rancho Bernardo and Mira Mesa). I could greatly reduce my drive time to the benefit of carpoolers if I was permitted to use the HOV lane when I am committed on the ride, with Waze. I typically am starting with the carpool confirmed and in progress before I have the option to enter the HOV lane.

Please make it so that drivers of the waze app are permitted to use the HOV lane when they are in a carpool in progress even if the pool buddies are joining the ride down the road after I exit the freeway. It's all for the benefit of reducing congestion, pollution and increasing worker productivity, getting to work faster.

Thank you for your consideration.

-Philip

Subject: I support increasing the use of zero-emission vehicles (SB 498)

Comment:

I support increasing the use of zero-emission vehicles, especially electric vehicles. Fuels used should have low emissions during refining, also. Vehicle miles traveled is difficult to reduce since about half the families of Fresno, cannot afford cars and rely on Uber or others must drive out of their way to pick them up. Homeless children moved far away to limited shelters often want to attend their prior school.
