Subject: Fireplace burn rules

Comment:

To Whom this concerns: I recommend that all wood or cellulose burning in fireplaces in the San Joaquin Valley be illegal. Only natural gas or propane type gas be allowed. Several months of the year our air is extremely polluted. Fireplace use is "entertainment" not a necessity. Designating certain burn days is impossible to monitor. "Burn if your registered" is assuming that others that are not "registered will follow the rules. Well, why do I smell smoke all evening long on those "registered" days. Just like having 'no smoking' areas in bars and restaurants is ridiculous so is part time burning of wood or pellets. We know that fireplace burning creates 2.5pm and that is very harmful to our health. The local Air board must feel citizens "right" to burn is more important than our health. Fireplace burning is one area that can be completely controlled by laws. Lets put health FIRST not ideology or politics. Thanks

Peter Dorian

Subject: Support for Ned Leiba letter on PM2.5 plan

Comment:

PUENTES has already engaged in partnerships with SUSL, SJCOE, the Port of Stockton, Ten Space Development and the SJC Fairgrounds to plant more than 1500 trees and involve a great part of the Stockton community in revival of our distressed and inadequate tree canopy. We are also developing a tree nursery and seeking support for a new campaign together with the Housing Authority, STAND, SUSL and SJ Delta College to mobilize community support for urban forestry in some of the most environmentally impacted neighborhoods of our community. Working with our neighbors in the Boggs Tract community where our farm is located, we have begun to recognize that we can create more wholesome living conditions for our families by concerted action, especially when public authorities recognize and support the grassroots efforts of our citizens. We implore your action to help us recover a healthful environment through the restoration of our tree canopy.

Comment:

Subject: Evidence Invalidating EPA PM2.5 NAAQS and SJV PM2.5 SIP

Please consider my attached 73-page September 14, 2018 SJVAPCD comment regarding the 2018 PM2.5 State Implementation Plan for the San Joaquin Valley. My comment contains strong evidence that invalidates the 1997 and 2012 EPA PM2.5 NAAQS, as well as proposed new PM2.5 regulations. There should be no additional PM2.5 regulations in the San Joaquin Valley based on my evidence, which I have presented to EPA.

This comment was previously submitted to sjvsipsupplement. If I do not receive a response from at least one CARB member, then I will assume that my comment has not been read or considered by any CARB member.

Comment:

Subject: Evidence re SJV PM2.5 SIP Showing NO PM2.5 Deaths in CA and US

Please read my October 1, 2018 attachment "Recent PM2.5 Activities Documenting NO Relationship Between PM2.5 and Total Mortality in US." I provide weblinks to overwhelming evidence of NO relationship between PM2.5 and total mortality in California and the US. This evidence challenges the scientific and economic validity of the EPA PM2.5 NAAQS and challenges the validity of the SJVAPCD 2018 PM2.5 SIP.

Comment:

An increase of PM 2.5 is predicted due to the lease of more federal land for oil drilling. Oil pump jacks without carburetors release PM 2.5. dust. Five oil producers in Central Valley created more direct PM2.5 than is produced by all passenger vehicles +light +medium-duty trucks combined, Oil Companies often flare off excess gas producing NOx (from Cherylyn Smith) I feel PM 2.5 linked to concentration difficulties as well problems with circulation to the brain.
