Comment:

This is the link to the below information. I may update this file prior to the Public Meeting.

<http://www.saladbar2000.com/california/press/folder/ventura.pdf>

To California ARB

re SIP Commitment for Pesticide Emission Reduction

Ventura County Non-Attainment

<http://www.arb.ca.gov/planning/sip/pubnotevent.pdf>

September 14, 2007

Truck Farming of Strawberries in Ventura County and the use of Methyl Bromide and other Pesticides

have caused the area to not attain the required reduction of harmful emissions.

California Strawberry Truck Farmers have been given Critical Use Exemptions for using MeBr. This

Critical Use Exemption is no longer justified.

<http://www.epa.gov/ozone/mbr/>

Truck Farming of Strawberries is no longer viable due to the use of pesticides and MeBr and the

Distance to the Consumer Market.

<http://www.saladbar2000.com/california/press/folder/EPA.pdf>

Hydroponic Technology and Renewable Energy is now able to replace Truck Farming of Strawberries

and the use of MeBr and Pesticides. The entire 2+ billion pound crop of Truck Farmed Strawberries

can be grown Nationwide Indoors using Hydroponic Technology and powered by Renewable Energy.

These links support the use of Hydroponic Technology for growing Strawberries.

<http://www.epa.gov/Ozone/mbr/casestudies/volume3/hydropn3.html>

<http://www.ars.usda.gov/is/AR/archive/nov98/hydro1198.htm>

These links show the Renewable Energy Model to Power the Indoor Farms nationwide.

<http://www.saladbar2000.com/genset/>

<http://www.saladbar2000.com/generation/>

I request ARB deny the request to use MeBr for the production of Truck Farmed Strawberries. I further

request California State Agencies not be allowed to purchase any Strawberries produced using MeBr.

Any such purchases would make California an "Enabler of Bad Agricultural Practices".

http://ozone.unep.org/Assessment_Panels/TEAP/members.shtml

TEAP Methyl Bromide Technical Options Committee (MBTOC)

MBTOC already considers soilless culture to be an alternative to methyl bromide in many applications.

You can review MBTOCs extensive review of alternatives for use in agriculture and food processing by downloading the MBTOC 2007 Assessment Report found on www.unep.org/ozone then go to historical meeting documents, TEAP and TOCs and look for our Assessment report. According to the Global Ban on MeBr the "Alternative to MeBr" does not have to be a "Chemical". It can be a "Technology". I request ARB force a faster track to eliminate MeBr used for Truck Farmed Strawberries. This request is supported by the facts that a "Technical Alternative to MeBr Does Exist".
