Comment:

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Comment:

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Dear Luis Cabrales:

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also

urge you
to include additional VOC reductions from some of the worst
culprits -
multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families
by
significantly reducing these air pollutants that emanate from
consumer
products.

Thank you.

Sincerely,
Darek Leiner

Subject: Get HARMFUL Chemicals Out of Consumer Cleaning Products
Comment:

June 10, 2008

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to please strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to please adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Sincerely,

William C. Briggs, Jr.

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Estimada Sra. Nichols,

La presente es para exhortarla a que reduzca estrictamente los químicos dañinos que se encuentran en los productos de limpieza y otros productos del consumidor. Al regular y reducir estos químicos de los productos del consumidor, el estado de California establecerá otro precedente en la protección de la salud de nuestras familias y de los trabajadores.

Los Componentes Orgánicos Volátiles (VOCs, por sus siglas en inglés) dañan la salud de nuestras familias y contaminan nuestro aire. Todos somos vulnerables a los efectos dañinos de estos químicos, los cuales frecuentemente son utilizados en nuestros lugares de trabajo y donde nuestros hijos estudian y juegan.

Muchos niños en nuestras comunidades padecen asma, y los químicos que emanen de los productos del consumidor solo aumentan las posibilidades de que estos niños sufran ataques con más frecuencia o de que desarrollen esta enfermedad en el futuro. Además, los adultos tienen riesgos más elevados de padecer cáncer o enfermedades del hígado o los riñones a causa de los productos que usan diariamente dentro de los hogares.

Como consumidor y ciudadano consternado, urjo a la Mesa Directiva del Estado a que fortifique la regulación de productos del consumidor. Además, yo le urjo a usted a que incluya reducciones de VOCs de algunos de los principales contaminantes en esta categoría: los limpiadores multiusos y productos para limpiar grasas y cristales.

Por favor utilice esta oportunidad para proteger la salud de nuestras familias reduciendo significativamente los contaminantes del aire que emanen de los productos del consumidor.

De antemano muchas gracias.

Atentamente,

Sincerely,

Anai Ibarra

Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you

to include additional VOC reductions from some of the worst
culprits -
multipurpose cleaners, degreasers and glass cleaners.

Quite frankly, I don't buy these things, but am exposed to them
when I go
to restaurants and grocery stores. I don't appreciate the
exposure.
Also, I don't have children, but I do have cats, which cannot
metabolize
even what we can. If the toxins got taken out of cleaning
products, then
maybe I might start buying them again.

Please take this opportunity to protect the health of our families
by
significantly reducing these air pollutants that emanate from
consumer
products.

Thank you.

Sincerely,

Kathryn Hargreaves

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits - multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Sincerely,

Thomas Conroy

Mary Nichols
Chairman
California Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, CA 95812

Dear Chairman Nichols,

I encourage you to strongly reduce the harmful toxics found in cleaning and other consumer products. By regulating and reducing these chemicals from consumer products, the State of California will set another precedent in protecting the health of families and workers.

Volatile organic compounds (VOCs), harm our families' health and contaminate our air. Everyone is vulnerable to the harmful effects of these chemicals, which are often used where we work and live and where our children study and play.

Many children in our communities suffer from asthma, and the chemicals emitted by consumer products only increase the chances that they endure more frequent attacks or develop asthma in the future. Furthermore, adults may experience an increased risk of liver and kidney damage and cancer from the daily use of consumer products.

As a consumer and concerned citizen, I urge the California Air Resources Board to adopt tougher regulations on consumer products. I also urge you to include additional VOC reductions from some of the worst culprits -

multipurpose cleaners, degreasers and glass cleaners.

Please take this opportunity to protect the health of our families by significantly reducing these air pollutants that emanate from consumer products.

Thank you.

Sincerely,

Peter Klosterman
