Subject: URGENT: save the Amazon rain forest
Comment:

Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
Don't punt your climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil. Expansion of EVs broadly, and public transportation goals to reduce domestic consumption equivalent to Amazon oil import totals.

Subject: (CARB) public review process of 2022 climate change scoping plan
Comment:

<p>To: California Air Resources Board (CARB) public review process of the 2022 California Climate Change Scoping Plan</p>
<p>I am a very concerned citizen about climate change plans and urge CARB to restrict fossil fuel expansion domestically and globally. I also feel it is urgent to protect Amazon Indigenous rights. Please rein in rogue refineries and commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where NEW oil drilling in the amazon is being planned. Don't punt your climate impacts to communities in the Amazon. Please present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon. And please commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil Expansion of EVs broadly, and public transportation goals to reduce domestic consumption equivalent to Amazon oil import totals. I'm counting on you to make the right choice to protect our climate, the Amazon and its Indigenous people. Thank you, Nicolee McMahon</p>

Subject: Amazon Crude
Comment:

<p style="color: #333333; font-family: Helvetica, Arial, sans-serif; font-size: 16px; background-color: #ffffff;">California consumes nearly 50% of all oil exports from the Amazon globally (nearly 1 in 9 gallons pumped in-state on average). As a concerned citizen, I urge California to not be complicit in driving new oil drilling in the Amazon and to regulate refineries's crude sources and volumes. I ask that we:</p>
<ol style="color: #333333; font-family: Helvetica, Arial, sans-serif; font-size: 16px; background-color: #ffffff;">
<li style="margin-left: 15px;">Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
<li style="margin-left: 15px;">Don't punt the State's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
<li style="margin-left: 15px;">Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil. Expansion of EVs broadly, and public transportation goals to reduce domestic consumption equivalent to Amazon oil import totals.

<p>Thank you.</p>

Subject: Cut the supply & demand for Amazon crude

Comment:

<p>I am writing to the California Air Resources Board to demand that they prioritize ending reliance on Amazon crude as part of their climate change plans.</p>

<p>Here are my specific demands:</p>

<p>1. Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.</p>

<p>2. Don't punt California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.</p>

<p>3. Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil. Expansion of EVs broadly, and public transportation goals to reduce domestic consumption equivalent to Amazon oil import totals.</p>

Subject: Cut the Supply and Demand for Amazon Crude Oil

Comment:

As a resident of the State of California, I request that the California Air Resources Board prioritize the ending of reliance on Amazon crude as part of their climate change plans.</p>

California accounts for approximately 50% of the global consumption of Amazon oil?</p>

Crude oil from the Ecuadorian region of the Amazon is refined right here in California and sold to thousands of businesses and millions of Californians as fuel. Now there are plans to expand oil production in Ecuador – thanks to demand from California – which means over 8 million acres of roadless rainforest will be leased for oil development.</p>

Consider a Commitment by California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.</p>

Don't pass on California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.</p>

Subject: Cut the Supply and Demand for Amazon Crude
Comment:

As the top consumer of Amazon oil, the state of California is driving new oil drilling in the region. With national protests happening in Ecuador currently calling on protection of the Amazon and Indigenous rights, I call on governments driving up demand for crude oil to take positive action. The current scoping plan from CARB (California Air Resources Board) has plans to double fossil fuel infrastructure in the state while continuing to import Amazon oil.

It is Urgent that we must:

- Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
- Don't punt California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
- Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil.

- I and many others are extremely concerned that California consumes nearly 50% of all oil exports from the Amazon globally (nearly 1 in 9 gallons pumped in-state on average).

- We call upon the California Air Resources Board (CARB) to not become complicit in driving new oil drilling in the Amazon, and that they must step forward to regulate refineries' crude sources and volumes.

- We Urgently recommend that CARB also take steps to ensure California refineries are not sourcing crude oil from regions where human rights violations are occurring with impunity; and require refineries to

ensure they will not source crude from areas of new drilling in the Amazon, now or in the future.</p>

<p style="box-sizing: border-box; margin: 1em 0px; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;">- Crude oil from the Ecuadorian region of the Amazon is refined in California, selling to thousands of businesses and millions of Californians as fuel. Unfortunately, there are plans to expand oil production in Ecuador - "thanks" to the demand from California - meaning over 8 million acres of roadless rainforest will be leased for oil development. </p>

<p style="box-sizing: border-box; margin: 1em 0px; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;">However, at the present time, we have little time at a chance to ensure fossil fuel expansion is not taking place in either California nor the Amazon.</p>

<p style="box-sizing: border-box; margin: 1em 0px; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;">I am a California resident and submitting my comment to urge CARB that any climate change plans being considered, and going forward, should restrict fossil fuel expansion – domestically and globally. CARB can require refineries to put Indigenous rights screens in place and mechanisms to ensure that oil will not be sourced from new drilling in the Amazon.</p>

<p style="box-sizing: border-box; margin: 1em 0px; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;">As extraction communities in California and Indigenous communities both face ongoing oil spills and pollution, it's important that the state doesn't rely on increasing domestic production in order to reduce its use of Amazon crude. We need a just and sustainable future that doesn't involve fossil fuel expansion at home or in the Amazon. </p>

<p style="box-sizing: border-box; margin: 1em 0px; outline: 0px; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;">During the past week at the Summit of the Americas, we put the Linked Fates of California and the Amazon on the forefront. Now we must build on this progress by pushing for policy change. We must call for stronger policies to end U.S. and California's complicity in new oil drilling in the Amazon once and for all.</p>

Subject: New & Lower CA Fossil Fuel Needs With Higher Efficiency Standards!

Comment:

I
all on the
California Air Resources Board (CARB) to present a
plan to reduce and/or eliminate its consumption of crude oil,
especially oil from the Amazon. Currently, California consumes
nearly 50% of all oil exports from the Amazon globally--thats
insane! Further, we must commit to a policy that ensures that
California refineries are not sourcing crude from regions where
there are Indigenous rights violations or from regions where new
oil drilling in the Amazon is being plannedWe also
must commit California to new fuel efficiency
standards that expands electrification of fleets so that we
avoid the need for any fossil fuels, especially those coming from
the Amazon!Thanks!

Subject: Cut the Supply & Demand for Amazon Crude

Comment:

<p>To whom it may concern,</p>

<p style="color: #333333; font-family: helvetica, arial, sans-serif; font-size: 16px; background-color: #ffffff;">We understand the California Air Resources Board (CARB) is in the process of collecting public feedback on the California Climate Change Scoping Plan. Not only will this plan be hugely influential in determining climate action in the Golden state for the next 20 years, but it will also have impact on new oil drilling in the Amazon.</p>

<p style="color: #333333; font-family: helvetica, arial, sans-serif; font-size: 16px; background-color: #ffffff;">As the top consumer of Amazon oil, California is driving new oil drilling in the region. With national protests happening in Ecuador right now calling on protection of the Amazon and Indigenous rights, it’s ripe time we call on the governments driving up the demand for crude oil to take action.</p>

<p style="color: #333333; font-family: helvetica, arial, sans-serif; font-size: 16px; background-color: #ffffff;">The current scoping plan from CARB has plans to double fossil fuel infrastructure in the state while also continuing to import Amazon oil. </p>

<p style="color: #333333; font-family: helvetica, arial, sans-serif; font-size: 16px; background-color: #ffffff;">We urge you to do the following:</p>

- <li style="color: #333333; font-family: helvetica, arial, sans-serif; font-size: 16px; background-color: #ffffff;">Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.Don’t punt California’s climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil.

<p>Thanks for your serious consideration.</p>

<p>Sincerely,</p>

Subject: 2022 Climate Scoping Plan
Comment:

I am in opposition of fossil fuel expansion domestically and globally.

This can be done by:

- Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
- Don't punt California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
- Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil.

I urge CARB that any climate change plans going forward should restrict fossil fuel expansion– domestically and globally. CARB can require refineries to put Indigenous rights screens in place and mechanisms to ensure that oil will not be sourced from new drilling in the Amazon.

Help control climate change and enviromental pollution.

Subject: Draft of Climate Change Scoping Plan

Comment:

The current scoping plan from CARB has plans to double fossil fuel infrastructure in the state while also continuing to import Amazon oil. This plan needs major adjustment to reflect concern for impact upon indigenous rights and bolster our environmental justice and climate responsibilities and commitments. We should be inhibiting exploitation of the Amazon rather than supporting it.

It is time to –

- Rein in rogue refineries.**Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
- Not punt California's climate impacts to communities in the Amazon.**Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
- Commit California to new fuel efficiency standards**and expanded electrification of fleets that consume the most Amazon oil.

Thank you for your

consideration.</p>

Subject: Stop the toxic legacy of fossil fuels in both California and the Amazon

Comment:

As the top consumer of Amazon oil, California is driving new oil drilling in the region. With national protests happening in Ecuador right now calling on protection of the Amazon and Indigenous rights,**it's** time for our state government to take action and stop **driving up the demand for crude oil****.**

Specifically, California must:

- Rein in rogue refineries.** Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
- Don't punt California's climate impacts to communities in the Amazon.** Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
- Commit California to new fuel efficiency standards** and expanded electrification of fleets that consume the most Amazon oil.

The current scoping plan from CARB has plans to double fossil fuel infrastructure in the state while also continuing to import Amazon oil. That is wrong and must not be allowed to happen.ny climate change plans going forward should restrict fossil fuel expansion– domestically and globally. CARB can require refineries to put Indigenous rights screens in place and mechanisms to ensure that oil will not be sourced from new drilling in the Amazon.

Subject: Restrict Fossil Fuel Expansion

Comment:

I want to urge CARB that any climate change plans going forward should restrict fossil fuel expansion – domestically and globally. CARB can require refineries to put Indigenous rights screens in place and mechanisms to ensure that oil will not be sourced from new drilling in the Amazon. Please take the following

actions:

- <ul style="box-sizing: border-box; padding-left: 0px; list-style-type: none; color: #636161; font-family: Montserrat, sans-serif; font-size: 16px; background-color: #ffffff;"><li style="box-sizing: border-box; list-style-type: disc; line-height: 1.5em; margin: 0px 0px 0.5em 1em;">Rein in rogue refineries. Commit California to a policy/regulatory agenda that ensures that California refineries are not sourcing crude from regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.
- <li style="box-sizing: border-box; list-style-type: disc; line-height: 1.5em; margin: 0px 0px 0.5em 1em;">Don't punt California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon.
- <li style="box-sizing: border-box; list-style-type: disc; line-height: 1.5em; margin: 0px 0px 0.5em 1em;">Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil. Expansion of EVs broadly, and public transporta

Subject: Cut the supply and demand for Amazon crude

Comment:

<p>As CARB is in the process of collecting feedback on the California Climate Change Scoping Plan, I urge the organization to cut its supply and demand for Amazon crude (i.e. oil drilled from the Amazon). California is one of the Amazon's top consumers; oil drilling in the Amazon has cost the lives of indigenous peoples residing the Amazon, including the region's agriculture/ environment. If California continues pushing for new oil drilling, this will increase fossil fuel production, which is already too exponential and can result in dire consequences (including abnormal and intense climate conditions, climate catastrophes-- which affect companies and their profits, health risks, etc.).</p>

<p>I urge CARB to:</p>

<p>1. Commit California to a policy/ regulatory agenda that ensures that California refineries are not sourcing crude form regions where there are Indigenous rights violations or from regions where new oil drilling in the Amazon is being planned.</p>

<p>2. Not punt California's climate impacts to communities in the Amazon. Present a plan for California to reduce and/or eliminate its consumption of crude from the Amazon</p>

<p>3. Commit California to new fuel efficiency standards and expanded electrification of fleets that consume the most Amazon oil.</p>

<p>Thank you.</p>
