Subject: GreenGas Emmissions

Comment:

We as a state must do whatever possible to control green gas emmissions. We know this is harmful and it is the responsibility of the elected officials and concerned citizens to work toward eliminating this.

The technology is available and it is imperative that action be taken immediately.

With all the talk about greenhouse gas, and the bail out of the American auto makers, there should be restrictions on what types of vehicles are manufactured in the USA. Also what is imported from foreign countries. From my perspective only hybrid vehicles, big or small should be permitted on California roads.

It is with great concern for the future of our lovely state and planet that I ask you to support the reduction of greenhouse gas emissions in California. The sooner that we begin to take measures to protect our air and our global home, the less dire our future will be.

This issue should be at the forefront of all else, in my opinion. A sick planet cannot support even a healthy economy. Thank you for your support.

Sincerely,

Lisa Frangente
