Comment:

High pressure underground storage of a hazardous (flammable, explosive) potent greenhouse gas in a metropolitan area riddled with known (and unknown) geologic faulting defies any logic. Develop a plan for decommissioning this ticking time bomb.

Subject: Aliso Canyon Should Be Closed

Comment:

The Aliso Canyon facility should be closed, because the Health & Safety risks associated with the facility outweigh the benefits derived from the facility. Based on the historical usage of the facility, I do not believe Aliso Canyon is essential for taking care of the energy needs of Southern California residents. A few months ago, the LA Times wrote an article, which question whether SoCal Gas actually needed to use the Aliso Canyon field based on the 10 year usage history of the field. Beyond the LA Times, you can reach out to Food & Water Watch as well as the Porter Ranch Neighborhood Council for additional information. In short, I believe SoCal Gas/Sempra's desire to keep Aliso Canyon open is based on their desire to buy natural gas cheaply, store it at Aliso Canyon, and then sell it when the price is higher. The Health and Safety of Porter Ranch residents should be valued more highly than SoCal Gas/Sempra's desire to make a profit by trading natural gas.

Other Comments:

- 1) I am pleased with the long-term health study.
- 2) I believe an improvement on the settlement would be for SoCal Gas to make donations to Castlebay Elementary School and Porter Ranch Community School. I think a donation/allocation of settlement funds is appropriate, because both of these schools needed to be relocated during the gas leak/blow-out. In short, some of the settlement funds should be allocated to local elementary schools, since it helps the kids, who are/were directly impacted by the gas leak, as opposed to more distant projects in areas that weren't impacted by the gas leak.
- 3) Many residents in the Porter Ranch area have developed health problems that they believe were caused by the gas leak.
- 4) It is hard for me to believe that the ancient infrastructure (60 year old pipes) that are stressed when gas is pumped in and out are actually safe. For example, SoCal Gas had to close 2/3 of the re-opened pipes that were allegedly considered safe. To me, Aliso is a ticking time bomb. The Health and Safety of Porter Ranch residents should not be sacrificed in favor of SoCal Gas' interests.

Subject: My health change sense the leak.

Comment:

I have according to my Doctor's a lung disorder that they are still not sure what is causing my limited lung capacity. This all started at the time of the methane leak at Aliso Canyon. Doctors have put me thru many tests over the past years sense the leak. My Doctor's are still conducting research to find out if the methane leak could be the cause of my lung problem. So I am saying that it is going to take time and research to determine the long term effects of the methane leak on individuals living in the affected areas.

Subject: Aliso Canyon proposed public settlement with So Cal Gas

Comment:

I have many concerns about Aliso Canyon continuing to function and would very much like to see it shut down; and much sooner than the 9 years left per Governor Brown's agreement to shut it down. We were not made aware of the gas wells presence when we bought our home in Chatsworth many years ago. Their presence would have been an important consideration in weighing our options of whether to buy a home in this area.

As for the settlement, one big concern is in regards to the continuous real-time fence monitoring that SoCal Gas is required to pay for, for at least the next 8 years. Who and/or what organization is going to be doing the monitoring? It should be an objective 3rd party like the EPA, SQAMD, or other independent organization that will conduct the monitoring. It SHOULD NOT be SoCal Gas or an affiliate as they are not an objective, trustworthy 3rd party.

Subject: Comments

Comment:

I am a Porter Ranch resident. There are at least two things that Regulators are allowing SoCalGas to get away with.

(1) There are no safety valves at the bottom of every active well. If the blown out well had one, the blow-out, which caused huge damage to the people of Porter Ranch and to the environment, would have lasted a few hours instead of four months. We are asking for a repeat.

(2) After 2 1/2 years, there is still no root cause analysis report. As a result, we are surely missing some corrective actions. This Agreement is inadequate because the causes attributable to SoCalGas are being hidden.

This situation is mind boggling. It represents gross dereliction of duty by SoCalGas and its Regulators.

Subject: Require biogas facilities to lower their leakage rate

Comment:

I read the recent Aliso Canyon Mitigation agreement and was heartened to see that the settlement would result in the capture of methane emissions from some California dairy farms. However, I was dismayed to read a statement from Environmental Defense Fund's Timothy O'Connor that California's existing biogas infrastructure (that the methane captured at dairy farms would feed into) is also significant source of methane leaks. I am concerned that methane will be captured at dairy farms only to leak into the atmosphere at a later point. I urge the ARB to ensure that new biogas facilities built using this settlement money be held to high standards regarding leakage, so that the settlement will result in a true capture of methane emissions.

First Name: Maureen

Last Name: Capra

Email Address: tatcap@aol.com

Affiliation: Porter Ranch Resident

Subject: Aliso Canyon

Comment:

Regarding the proposed settlement I object to the money going to Central California and the cows "farts". That is ridiculous! The money should come back to the community. It can be sued for Solar, air filtration for the home and schools. I know the filters for air filters cost me a fortune that I cannot change them as I should I just vacuum out the dirt but I really need new filters every three months and for 4 filters which comes to about \$1,000. With the Asthma that I have from living here for 44 years. You can take that money put great air filtrations in the schools and the homes of the people that are suffering. And step up on the Health it should be \$50,000 not \$25,000 but that is better than none but we need more for a true Health Study. and the best fence line system we can get and it should stay intact for a few years after the closing of Aliso Canyon as so much is concentrated in the ground. I have lived here in Porter Ranch about a mile for the well that blew and my children, grandchildren and myself and my husband have suffered over the years but since the blowout things in our health is much worse my asthma, my eyes, loss of hair, etc. That money from this proposed Settlement needs to come back to our community. Help me pay for my solar which we installed after the blow out. Had to resurface my pool, paint my house, it still is in my house in my furniture and floorings. I did not get a deep cleaning as we did not move out so SoCalGas denied me as well as a air filter for my son who is disabled at his apartment across the street from the 91344 zip code and they still smelled the blow out.

Do what is right for once as the CPUC and DOGER do not seem to care about our health.

Put that money where it counts in the community, raise the Health study money, filter our homes and schools, solar our community

Thank you

The Capra Family, and grandchildren (who had to spend that Christmas inside my house as it smelled so bad and we were all getting bloody noses) They could not come to my house for almost 6 months with that blowout.

Subject: Aliso Canyon Unfair settlement

Comment:

Regarding the settlement that has been proposed for Aliso Canyon SoCalGas. I feel that is totally inappropriate for the Central Valley to get part of the settlement. It should come back to the residents that have suffered in Porter Ranch, Granada Hills, And Chatsworth. The health settlement should get at least 40-50 million for a proper study. We are the ones that have suffered and who knows what willl happen in the future, look at the firemen and people that survived 911 and how they are all getting the cancers, etc. We could put good air filtration in our homes and schools so that we can breath clean air. We all know that once it closes Aliso Canyon, it is going to take years for the chemicals to come out of the soil up in those hills, it is in our yards, houses, furniture, carpets, floors etc. WE are still living in that. They would not clean our home as we did not move out (saving them money by not moving out) My pool had to be drained and resurfaced as who knows what was in that water and the pool walls. My house needs to be painted, deep clean floors and furniture. We are the ones that suffered and still suffering from this Blowout and you want to give the Central Valley the money, what are you thinking! I am so disappointed in the CUPC, Dogger and other representatives that are suppose to care about our lives especially Gov. Brown who had the authority to shut it down but instead though of their profits. Think about us the people for once and everyone do the right thing and keep the money in the community. I am sure those farmers with all those cows make plenty of money to collect their own farts and mitigate them!!! the fence line system needs to stay up for many years and that will costs more also along with a hood health study and air filters for our homes and schools as the ones we got during the blowout cost a fortune for new filters. Our government is failing us so do the right thing with the proposed settlement for us. The money needs to come back to the community that suffered.

Subject: So cal Gas- Alliso Canyon!

Comment:

I am a resident of Porter Ranch. I oppose SoCal Gas doing any more activities in my neighborhood. Haven't they done enough already?!! They make money and we die bit by bit on a daily basis inhaling the gas that's being leaked into our neighborhood even after they have supposedly sealed the leak?!!

They created a mess that affected the lives of thousands of people, they got a little fine and now they come back in the name of safety to create a bigger mess for the very people they could NOT care less, to begin with? Why is the state even considering anything that would come from a shady institution? Mistakes happen, coverups should not. This is the same institution nothing has changed. They lied before and they will in the future. Please STOP them and get them out of our backyards. Thank you.

Subject: Aliso Canyon mitigation against biomethane

Comment:

I do not want biomethane or anything stored at the Aliso Canyon facility. The facility leaks constantly and needs to be shut down.

The money from the settlement should be used for environmentally friendly projects in the LA county area, near Porter Ranch where this disaster happened and continues to leak daily. SoCal Gas should not be given any money for their projects, they should only pay the fines.

SoCal Gas should not be allowed to put anything into the Aliso Canyon storage facility, whether it is methane or biomethane. The facility is constantly leaking and causing bad health effects for people who live in the area, as well as children and teachers who attend the local schools.

Subject: Appropriation of Aliso Settlement Funding

Comment:

It is not right for any settlement funds to be spent, let alone millions of dollars from the Aliso Settlement, to be used on dairy cows in the Central Valley. That money should be used for mitigating the 2015 blowout and needs to be used in Los Angeles County (where the methane polluted our air) by companies that are providing environmental good (such as solar panels, etc.). Any companies getting these funds should have NO connection to SoCalGas or Sempra Energy in ANY way.

Subject: TERRIBLE PRECEDENT

Comment:

This settlement set a terrible precedent for future corporate polluters. SoCalGas poisoned tens of thousands of California's and the state is going to invest up to 34.1 million dollars in projects that SoCalGas and Sempra Energy will get to profit off of in the long run. No projects that will ultimately benefit SoCal Gas should be in the final settlement. SoCalGas initially lied about the leak, then lied about the long term health impacts and they get "punished" by having the state of California in "biomethane" capture project that they have been advocating for in Sacramento for years. This is disturbing on so many levels. If SoCalGas and Sempra want to see more "biomethane" capture they should invest in it themselves in no way should public money from a settlement they have to pay the state because they POISONED our citizens be spent to help their long term profit margins. The state of California and the City of Los Angeles need to fix this immediately.

Comment:

PLEASE Do not GIVE \$26.5+ MILLION to SolCalGas! San Fernando Valley Businesses suffered enormous losses due to So CAL Gas's negligence! The money should be used to mitigate methane in Los Angeles. On Jan 13, 2015 before the largest methane blowout in US History JPL reported a NASA mountaintop

sensor finds methane dome over Los Angeles

<https://www.sciencedaily.com/releases/2016/02/16224164934.htm>

SoCalGas Dirty Digester project was in the works and has been FULLY paid for by Cap and Trade program

This is pure corruption and a slap in the face to those who lost businesses, homes and still suffer from cancer causing toxins from the STILL LEAKING Aliso Storage Field.

Subject: Methane Gas Storage at Aliso Canyon

Comment:

We, at Porter Ranch, are already suffering enough financially and health-wise. I oppose storage of biomethane stored at the Aliso Canyon facility. It has been proven regarding constant leaks and hazards it poses to residents & vicinity.

The money from the settlement should be used for environmentally friendly projects in the LA county area, near Porter Ranch where this disaster happened. SoCal Gas should not handle project pertaining to gas storages in populated areas or be given any money for projects that pertain to this. Instead, pay the fines and award affected residents in the area.

Subject: Capture of Methane

Comment:

The community of Porter Ranch was excited to hear that the settlement included funding for the health study, however as a community member, I take strong issue with the portion of the settlement that addresses capturing the methane from everywhere outside of our community. This settlement should address elements in the North San Fernando Valley, not outside of it.

Subject: Please approve the So Cal Gas Settlement Agreement

Comment:

The Greater Conejo Valley Chamber of Commerce represents over 1,000 businesses and tens of thousands of jobs in the Conejo Valley region of Thousand Oaks, Westlake Village and Agoura Hills, California.

After reviewing the settlement agreement negotiated by California Air Resources Board and Southern California Gas we believe this agreement to be a fair and balanced resolution to the Aliso Canyon Gas Leak, and will help the state achieve its long term climate goals.

Furthermore, we support the strategy of capturing methane from dairies and using that renewable gas in transportation and other uses.

Thank you. Please contact me directly with any follow up questions.

Subject: Reject Dairy Digester Plan for Aliso Canyon Settlement

Comment:

Dear Chair Nichols,

I don't think it's appropriate to use the Aliso Canyon blowout as an opportunity to steer tens of millions of dollars toward cleaning up the California dairy industry's sprawling lagoons of dairy cow manure. I urge you to come up with a new plan that reduces California's dependence on methane gas, not prop up our addiction to a new form of it.

"Our duty to the whole, including to the unborn generations, bids us to restrain an unprincipled present-day minority from wasting the heritage of these unborn generations. The movement for the conservation of wildlife and the larger movement for the conservation of all our natural resources are essentially democratic in spirit, purpose and method."

-- Theodore Roosevelt

The Southern California Gas Company must be penalized for the impacts of releasing 109,000 tons of heat-trapping methane into the atmosphere, as well as carbon dioxide and volatile organic compounds (including BTEX).

The California Air Resources Board must redirect settlement dollars to Los Angeles residents--particularly those in lower income and vulnerable communities--for low-cost energy services, powered by truly renewable energy sources that reduce our dependence on methane gas.

Some options for helping consumers slash their demand for methane gas include promoting distributed energy resources, like solar and batteries, coupled with home energy efficiency retrofits, and building electrification that avoid the need for gas combustion in the first place.

I urge you to redirect the \$34.1 million allotted in the Aliso Canyon settlement for dairy digesters to impacted Los Angeles communities and towards reducing California's dependence on methane gas.

"A thing is right when it tends to preserve the integrity, stability, and beauty of the biotic community. It is wrong when it tends otherwise."

-- Aldo Leopold

Thank you for your consideration of my comments. Please do NOT add

Subject: Close Aliso Canyon

Comment:

The proposed settlement needs strengthening for the sake of reparations, due process and equity. To wit:

- ) Prioritize local relief, reparations and health restoration to make whole the most injured parties.
- ) Listen closely to the victims of SoCalGasCo's failures. Think of them as your families and children.
- ) When revising the settlement and emerging standards, as you should, think "Safety First." Not doing so would be a primary service failure on your part.
- ) End use of methane as an energy source. Anything less is murderous to future generations.

Thank you for your service and attention to the health and welfare of those whom you chose to serve.

Subject: Bio Methane retrieval by So. California Gas Co.

Comment:

I am writing to protest allowing Southern California Gas Co to 'collect' from cows in Northern California the methane gasses they produce, change it to biomethane gas, then transport it down to Aliso Canyon for storage and possible sale to the cities/counties of the Western US. They have proven untrustworthy, and not only is this program not established, it sounds rather implausible.

Another caution, transporting it down to Aliso is just asking for leakage troubles, not to mention millions of dollars to create pipelines to do this. It is dangerous and wasteful - I would think they are just getting money to help heal their losses for the huge methane leak that they lied about and then took 9 months to get fixed (if it is indeed fixed?). I live in this area, (Porter Ranch) and many still detect leakage that causes migraines and nose bleeds for some.

If So. CA Gas provides their own funds, they should keep the biomethane up in Northern California where they are collecting and producing it - not transport it down to Southern California. I also think they need to do some mock ups, studies and tests that are checked by third parties before they are ever trusted to do a new program again. They have to earn back our trust.

I believe the monies are better spent to help local (LA County) companies for environmentally friendly projects and that SoCalGas should have nothing to do with these projects, other than paying the fines. If in ten years they have played fair and participated in programs that help the clean up and progress of truly clean energy (NOT FRACKING) then perhaps we can trust them again.  
Thank you for your careful consideration.

Comment:

I grew up on 18838 Killoch Way, Porter Ranch, Ca. and now live at 16601 Foothill Blvd. #101 and was suffering with bloody noses, headaches, stomach aches, etc. I am disabled and they would not give me a air filter for my apartment as I live across the street from the zip code that was able to get them. At my apartment we did smell the odors and were affected just the other side of the hill so we did get the smells. I spend the days at my moms above address and we were all sick there. After 44 years of this smelling stuff and bloody noses, etc. They need to be shut down and the money should go to the community for air filtration for homes, schools and solar. This is a totally unfair settlement as the cows in Central Valley were not affected, WE WERE. The cow people have enough money to catch and store their own farts. The money should be for the health study, fence line and air filtration for homes and schools. Please change this settlement so that its fair to the community Central California has nothing to do with this and it is just giving back SoCalGas their money Not FAIR.

Comment:

Mitigation must be placed in La County and specifically in Porter Ranch of LaCity...Mitigation must focus on installation of 10,000 roof solar voltaic panels of >500sf followed with an additional 10,000 solar thermal panels with interconnections to pools/interior home heating..

Mitigation also must include a root-cause-analysis for SS-25 and all other wells which have been documented as having SSSVs through annual submittals to DOGGR but were found to have been removed for casing flow and eliminated tubing flows.

Mitigation must also include for all Sempra/SCGCo facilities/fields/wells an independent technical review of "permitted" vs "as-built" or "as-is" equipment.

SCGCo has LIED regarding the Safety Valves in aliso and probably Honor Ranch, PlayaDelRey, & Montebello.

Subject: Do not divert mitigation funds to the central valley

Comment:

Thank you for the opportunity to submit comments.

Voters for Environmental Responsibility is strongly against any mitigation funds leaving the affected communities in the San Fernando, Simi and Santa Clarita Valleys.

Please see our attached letter for more information.

## **Comment 70 for Aliso Canyon Methane Leak Mitigation Settlement (alisomitigation-ws) - 1st Workshop.**

First Name: Brian

Last Name: Wind

Email Address: [tandwfarms@aol.com](mailto:tandwfarms@aol.com)

Affiliation: T&W Farms

Subject: Comments in Support of Aliso Canyon Settlement Agreement

Comment:

T&W Farms dairy would like to express its strong support for the Aliso Canyon Methane Climate Impacts Mitigation Program which is part of the Aliso Canyon Settlement Agreement between The Southern California Gas Company ("SoCalGas") and the California Air Resources Board, Los Angeles City Attorney's Office, County of Los Angeles, and the California Office of the Attorney General. We have been working for a long time on these projects as one of the mitigation locations.

As stated in ARB's Short-Lived Climate Pollutant Reduction Strategy, methane has nearly 84 times the heat-trapping power of carbon dioxide over a 20-year period. Given the magnitude of the methane leak, we applaud ARB's efforts to come up with a mitigation program which not only corrects for these emissions, but also returns the funds with interest to those who reside in the Porter Ranch community.

Reducing methane at dairies by installing a covered lagoon biogas capture system is one of the most beneficial and cost-effective ways of reducing methane. We are relying on the Mitigation Program loan for a critical part of the funding to build the digester projects. These projects will inject the biomethane into the pipeline for use as a vehicle fuel. This will have the effect of reducing GHGs, creating jobs, improving air quality, and helping California meet its emission reduction targets.

These projects are an important example of a new approach to dairy methane reductions, by replacing electricity generation with CNG vehicle fuel. We want to emphasize that these projects advance California's global effort while improving air quality locally. Many trucks using this fuel, over time, will also be in the L.A. basin improving air quality there through the displacement of diesel.

The Mitigation Program enables these vital projects. Thank you for the opportunity to provide comments.

Kind regards,

Brian Wind

Subject: Opposing the terrible biomethane project

Comment:

We are demanding that the California ARB think about who is most affected by the 2015 blowout: the more than 1.5 residents of the San Fernando Valley. Not the chamber of commerce and other groups giving support for the SoCalGas dairy digesters project. None of their members have suffered through asthmatic attacks, severe skin rashes, migraines, etc. due to the emissions of methane and toxic chemicals.

Any projects should be done by companies in LA County, where the harm happened, that actually will benefit the environment such as solar and wind technologies. Not another carbon based fossil fuel that WILL leak from the wells where SoCalGas intends to store it and then sell to benefit its management.

Subject: Aliso Canyon Mitigation Agreement Comment

Comment:

The mitigation measure is fine for California's cattle and hog farmers but misses the mark addressing the continuous methane leaks affecting the Aliso canyon residences nearby. It seems like state was trying to reach its GHG reduction goal and some pet projects on the backs of Porter Ranch & vicinity communities!

Also besides methane, there are many other chemicals that affected the humans and pets. This was not addressed properly.

I would recommend the state involve the affected residences, neighborhood councils and other local representatives before making this mitigation measures final.
