Subject: SB 350 2020 Update public comment

Comment:

Dear CARB Staff;

Thank you for coordinating public comment.

It is crucial that this update assures we are meeting or exceeding the timeline and associated coordinating actions expressed clearly in SB 100.

Yours,

Bill Mayben

Subject: Draft SB 350 Integrated Resource Planning Electricity Target
Comment:

I believe the preferred alternative in the report does not take into account the ramifications of Governor Newsom's increased emphasis on addressing the climate crisis, and, in particular his executive order requiring all passenger vehicles sold after 2035 to be zero emission. In light of this I think the revised target should default to the Alternative in the Staff Report that included these assumptions so that, to quote the staff report:

"An alternative scenario developed as part of the 2017 Scoping Plan Update includes additional energy efficiency gains, additional ZEVs, and an increase in the RPS, among other measures, that result in electricity sector GHG emissions as low as 30 MMTCO_{2e}."

Please reconsider your targets to align them with this Alternative.

Comment:

I am in total support of Senate Bill 350. Considering the scientific evidence of climate change and the photographs taken of shrinking glaciers, loss of Arctic Sea Ice and other scientific analysis confirming this crisis, I am in favor of the bill.
