Subject: Comments on ARB's June 22nd Presentation on Offsets and Linkage

Comment:

Equator appreciates the opportunity to offer the attached letter regarding the June 22nd staff presentation on offsets and linkage. Equator commends ARB for its commitment to using high quality offsets as a mechanism to achieving cost effective greenhouse gas emissions reductions. We appreciate your consideration of our comments and value the opportunity to participate in the development of this rule making process. Please feel free to contact us if you have any questions.

Best Regards,

Jeff

Subject: Reduce Paperwork for Offsets

Comment:

GPI believes ARB is laying out a sound approach for approving offsets within the cap and trade program. We would suggest that the paperwork burden be minimized so it not be a barrier to conducting offset projects. We would also recommend that generic offset protocols be developed for those situations that don't fit within the targeted protocols currently under development by ARB.

Subject: Linkage and Offsets

Comment:

GPI is pleased ARB is allowing the facilities to develop offset projects throughout North America (depending on linkage with other programs) and apply those offsets for compliance in California. This is an important aspect of the this regulation that will allow industry to find the most inexpensive solutions for cap and trade compliance, minimizing impact on businesses and their customers, the residents of the state of California. The larger the linkage between jurisdictions for cap and trade, the better chance we can smooth out volatility in the price of allowances.
