Subject: Comments for AB 32 Scoping Plan Workshop of September 26, 2008

Comment:

...
The Draft Scoping Plan identifies vehicle feebates as a recommended Emission Reduction Measure to supplant the Pavley regulations in the event that the latter cannot be implemented. The fee schedule would "be designed to obtain cumulative emission reductions equivalent to those that would have been achieved under the Pavley regulations". The plan also contemplates a broader role for feebates to complement Pavley and create "an incentive for manufacturers to improve vehicles beyond what would be required by Pavley". However, staff has made no attempt to quantify the additional emission reductions that could be achieved with feebates.

Subject: benefits of highway speed reductions need analysis

Comment:

CARB should analyze the potential carbon emissions reductions associated with highway maximum speed reductions. Please see the attached document for supporting evidence.
