## i-MiEV

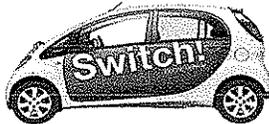

3

## Concerns

### 1. The amount of funds allocated for this program

- Insufficient for the expected demand of early adopters

- We hope the Board will increase the funds allocated for 2011/2012 as this will be a critical year for the general market's adoption of BEVs.

### 2. The change of maximum rebate amount based on ZEV Type

- **Why reduce i-MiEV (Type 1.5) to \$4000?**
- Even the Federal Tax incentive judges the i-MiEV equivalent to other larger vehicles.
