Rock Flat THP Unit 443 in 2007, pre-harvest. Note the different types and sizes of trees and the leaf litter that protects and enriches the soil.

Above: Rock Flat Unit 443 post harvest in 2008. Below: And 1 year later in 2009, after replanting. Note how dry and powderized the soil is now.

The same unit in 2010. Over 2 years after logging, the only discernible change is that there is some garbage in the slash pile on the right now. The replanted trees have hardly grown at all. (They are too small to be able to see in the photos.)

The water in an uncut section:

Downstream of areas that were cut in 2008:

(photographed in 2010)

Which would you rather drink?

8. Butte/Plumas Counties

9. Vicinity of Calaveras and Stanislaus National Forest

10. Vicinity of El Dorado National Forest

11. Vicinity of Feather Falls

12. Vicinity of Lassen National Forest

13. Eastern side of Mt. Shasta

14. Part of Plumas County

15. Shasta County, north and south of Highway 44

16. Tehama and Butte County, surrounding Highway 32

17. Shasta and Tehama Counties, between Highways 36 and 44
