Re: EFMP

Dear Sirs:

I object strenuously to this program at this time for the following reasons:

1. The state is worse than broke and cannot pay for it.
2. The alleged improvements in air quality do not address the additional pollution caused by the production of a new automobile.
3. It is also a hidden transfer of equity from the state to a small number of citizens. A form of wealth transfer disguised as an environmental program. To a group that probably does not even pay state taxes.

Thank you,

T. Alan Peterson, D.D.S.
