Re: AB 32 California Global Warming Solutions Act of 2006
CARB Public Meeting Agenda August 24, 2011 Item # 11-6-1

Su: Public Comment Request To Not Approve & Adopt The
Final Supplement to the AB32 Scoping Plan Functional Equivalent Document

Dear Chairman Nichols & Members of the Board:

I wish to submit my public comments requesting that the California Air Resources Board (CARB) not approve and adopt the proposed the Final Supplement to the AB32 Scoping Plan Functional Equivalent Document.

- ARB staff failed to include in the Alternatives Analysis and Technologies Assessment a comprehensive study of all potential Public Health Impacts and Public Health Care Costs.
- ARB has not conducted one comprehensive study of all green house gas impacts on public health, public safety, current water supplies, future food supplies and public socio-economic impacts.

I request that CARB require ARB staff to conduct a Health Impact Assessment for each Alternative Analysis Option and Alternative Technology to validate its Public Cost-Benefit prior to the final approval of the AB 32 Scoping Plan.

Respectfully,

Sofia Carrillo
