Jan Dietrick

We are sponsors of the **Soil Not Oil Conference** because **climate change is tearing the planet apart and Soil Not Oil is our ultimate salvation.**

We promote **Biological Pest Control by Natural Enemies** as part of regenerative **Climate Smart Agriculture**. We help the good bugs win in non-toxic agroecosystems that build living soil.

We also demand that our nation mobilize to reduce GHG emissions supporting **Citizens' Climate Lobby** that is creating the political will for Congress to act.

We are studying metrics and rewards for carbon sequestration in local **Climate Action Plans**. We love the **iMatterYouth.org** kids giving out climate report cards.

Help stop GHG emissions by joining **Citizens' Climate Lobby** at **citizensclimatelobby.org** and contact me to learn how to reward stewards of living soil.

Citizens' Climate Lobby

A nonpartisan, nonprofit organization that can empower you to become an advocate for a livable world with thousands of volunteers across the country promoting:

Carbon Fee and Dividend

A fair, simple climate solution

- Place a fee on fossil fuels at the source (mine, well or port)
- Return 100% of the revenue to U.S. households
- Apply a border adjustment to discourage businesses from relocating to where they can emit more CO2 and to encourage other nations to adopt an equivalent price on carbon

Stabilize the Climate and Boost the Economy

- Cut greenhouse gas emissions by 50% in 20 years
- Create 2.8 million jobs, boost our GDP and save 200,000 lives
