

San Rafael Channel Association

October 11, 2021

Ms. Liane Randolph,

My name is Nadine Urciuoli and I am the President of the San Rafael Channel Association which is a nonprofit public benefit corporation promoting and supporting the dredging, repair, maintenance and improvement of the San Rafael Channel as navigable waters for the benefit of the San Rafael community and the general public.

I am writing to you to ask not to move forward with the new regulations on Sportfishing. Not only would this effect the sportfishing operations but also the businesses which support them causing catastrophic economic problems for the marine commercial community. In addition, CARB's regulations will require major reconstruction of the boat's hull to account for added size and mass of modified engines and exhaust systems or the vessel must be removed from service. *The environment impact of rebuilding or replacement of these vessels outweighs the environment impact of continuing to use the current vessels with tier 3 engines.*

With Regards,

Nadine Urciuoli

President
San Rafael Channel Association
