I listened to the CARB meeting that included 21-9-5: Public Hearing to Consider Proposed Amendments to the Airborne Toxic Control Measure for In-Use Diesel-Fueled Transport Refrigeration Units (TRU) and TRU Generator Sets, and Facilities Where TRUs Operate.

I was prepared and expecting to make a comment regarding the refrigerant provisions of the proposed final rule. I had planned for a 9-12 meeting and had other professional commitments at 12:30 pm. I tried to stay on for the comments but because of the lunch break I was not called on to comment before I had to leave. You should be able to verify that I was signed up and had my "hand" up for the first several minutes of the public comment period.

I would appreciate it if you submit to CARB staff the attached comments, which I would have read.

Thank you,

Dan Chandler
