

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Allison Olvera and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also reduce expansions such as the expansion of the 710 Freeway.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as _____.

I am most concerned about the pollution the 710 raises because it directly impacts schools & neighborhoods.

I propose for the companies who use the freeway to provide trucks that aren't diesel powered. This would not just reduce fossil fuel emissions but it would also benefit workers who have to buy their own trucks.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Mayra Lopez and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also take action and remove so that industry isn't located near schools.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as my cousins who have asthma, ~~and~~ and suffer from the effects of pollution on a daily basis.

I am most concerned about refineries because they are known to be some of the worst violators of environmental rights and it is your responsibility to do something.

I propose for CARB to have and implement a plan to phase out refineries and move towards cleaner technology.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Mayra Lopez

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Kayleigh Wade and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also create a mandate that requires currently diesel-guzzling trucks to become electric and/or zero emissions vehicles. Their current levels of harmful emissions cause a huge strain on our health.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as everyone in my family over a certain age living with diabetes, and my dad developing memory-related health problems.

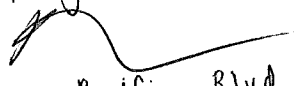

I am most concerned about the lack of inclusion of refineries because of the deep impacts they have on the health of low income communities of color.

I propose for CARB to take cumulative impacts in mind and move forward with tangible, problem-solving ACTION that provides low-income, environmental justice communities of color relief.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Kayleigh Wade

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Mariangela Rincon and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also take responsibility in rezoning industries / Land use and funding more green spaces around my community and those other low income communities affected

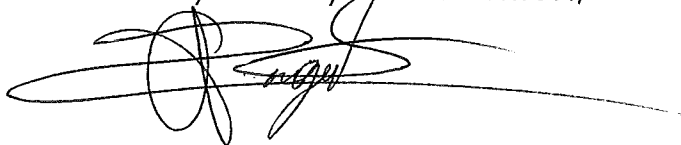

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as family of friends and colleagues that have lost or have members in the household suffering from asthma, birth defects, and many other health issues.

I am most concerned about my community not having solutions met because AQMD has failed us in the past with solutions, and industries filing for bankruptcy before they can even work on solutions with their own earnings.

I propose for no more expansions, remove the process of cap & trade, as well as bringing funding into the communities being affected by creating green spaces, employ our community members, and lastly fund transportation to community meetings.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

8629 Madison Ave, Apt A,
South Gate CA, 90280

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Montserrat Sandaval and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also be more focused on the companies & organizations that are polluting in communities. focus a lot more in making our air fresher.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as myself having asthma including my some of my baby nieces and nephew, and it's all getting worse.

I am most concerned about the transportation projects because our source of transportation involves cars and motorcycles. Especially with trucks coming in goods, we have so many and some are for the same companies.

I propose for 4 people to use solar power cars or electric car/trucks. For us using energy from the sun and for the air pollution not getting worse by burning all the oil. Solar power can help especially with the sun burning hot now days.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Montserrat Sandaval

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Maria Sarah Rivera and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also Reasoning for Polluters / Take away the trade from Cap's Trade.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as I have Congestive heart failure, my lungs are not working to their fullest capacity. I don't smoke.

I am most concerned about expansion of the 710 freeway disband because I am homeless and the expansion will displace shelters, senior home, apartments and it is so fun being homeless

I propose for every city to have their own shelter to help eliminate the homeless. It needs to give local hiring and implement clean energy so that all these trucks can stop polluting

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is David Barreras and I reside in Florence Graham, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also reduce industry in our communities

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as having to deal with non-fresh air and having breathing issues

I am most concerned about the health of myself and my family because we live in a very toxic community. I am also concerned about the kids in my community because they are exposed to the air.

I propose for having the facilities to be removed in our communities and put them in areas with no population.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Patricia Santillan and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also Reduce pollution in terms of industry, and remove the concept and use of Cap and Trade.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as having to deal with several health problems like asthma, and being at an increased risk of developing cancer due to toxic emissions by industrial sources. I am most concerned about my health because I live in a low income community of color, where I am at an increased risk of developing health problems, simply because I live near a freeway. I have family members who suffer from asthma, and have dealt with health problems as well. I propose for refineries to be included in CARB's plans as low income communities are affected by the toxins these industries release. For this reason it is important that CARB invest in clean renewable energy that will allow for less toxins to be emitted, and rather use such things to help exposure to toxic emission. Lastly, I urge CARB to set up a process whereby communities can develop petition CARB to weigh in and correct AQMD errors and bias in environment permitting and regulations.

Thank you for your attention,

friendly locations such as parks, and recreational centers.

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Mark Vasquez and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also do their jobs, make sure the environment and air is safe and not constantly letting companies keep polluting.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as giving both of my sisters and I asthma

I am most concerned about if the monitors are going to be enough because we know already that these refineries are polluting over the cap space.

I propose for CARB and AQMD to do their jobs right. Make more plans to make sure "air monitors that tell us what we already know." No more CAP & TRADE!!!

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Mark Vasquez
8951 California Ave B.
90280 South Gate.

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Janet Zamudio and I reside in Los Angeles, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also not allow expansion of industries that produce pollution, and take away the trade from cap + trade, and have industries abide by laws protecting our clean air.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as the increase of asthma in small children, the increase in cancer in low-income hispanic communities, and the increase of neighborhoods with polluting industries.

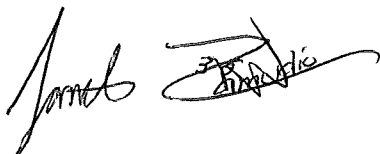

I am most concerned about children and teenagers because they go to school within a few miles or blocks from refineries, that can cause long term health effects for those who are the future of our communities.

I propose for California Air Resource Board to take actual action against industries harming the ~~stagnant~~ air in low-income communities as well as communities around polluting industries such as not allowing expansion of these companies.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Janet Zamudio

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Jesus Gallardo and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also take away cap & trade
& enforce the laws & regulations more strictly.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as affecting
my family with breathing problems & having
hotter days.

I am most concerned about transportation projects
because pollutants can come in easily & who
regulation which leads to pollution is in
communities.

I propose for a plan in which we have pollutants
be limited to only certain routes.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Judith Serrato and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also work on reducing pollution and industry by putting tougher regulations on expansions. we also need many more green spaces

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as having to see my long time neighbor pass away because of cancer and not being able to afford treatments.

I am most concerned about refineries because they are in the backyards of many people's home who have to live there without any ability to move out from those communities.

I propose for more green spaces instead of industry by not allowing/reducing the expansions of these industries.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

6325 Pacific Blvd. Suite 300
Huntington Park, CA 90255

August 7, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Brenda Martinez and I reside in Huntington Park, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also consider eliminating the
tracle component from cap n trade for reasons
that it affects my community dramatically allowing
more than suggested pollution.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as my
Uncle who passed from lung cancer about 2
years ago and who lived near industry.

I am most concerned about the industries near schools
because children who are affected will grow
up affected by the pollution.

I propose for that there is a reduction of
acress and emissions that industries emit
causing health damages to my
community. Reasoning to areas that are not
only people of color, and not complete environmental
racism.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention, Brenda Martinez
6325 Pacific Blvd. Site 300
Huntington, Park, CA 90255

August 7~~th~~, 2018

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Saulo Hernandez and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also Put lives before money, turn down on anything major polluters are asking to do.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as lead Poisoning on a child and asthma. due to water and air quality.

I am most concerned about the air quality, ~~monitors~~ because monitors won't do the job. we know the air is disgusting leftovers from the good millions they make.

I propose for Relocation of these companies, it would be an investment but it would save plenty, hundreds of thousands of life, driving in and out of California we see endless empty desert land far from people. That can be safer than operating in a city next to a school.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Saulo Hernandez

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Verenice Hernandez and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also think about how much there affecting with pollution and they should reduce pollution.

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as it affects everyone in our community in many different ways that kills us.

I am most concerned about our communities health because lately most babies and kids of this generation have many health problems thanks to all pollution and expanctions.

I propose for help shutting down all factories that are violating protocol and most rules.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention,

Verenice Hernandez

Honorable Air Resources Board Boardmembers and Staff,

Hello, my name is Adrian Encarnacion and I reside in South Gate, CA. This letter is to comment on California Air Resource Board (CARB)- AB617 Draft Community Air Protection Blueprint.

Environmental justice communities, like mine, need more than air monitoring, CARB should also take action with the electric trucks to be mass reproduced

Living in a community with heavy industrial activity has affected my health and the health of my family and neighbors, such as my friend who has been limited to do sports at our school.

I am most concerned about transportation products because they pass through residential areas where schools and houses are located which can cause long term affects through generations to come.

I propose for CARB to have strict laws on for electric trucks instead of diesel running trucks because we all know that many trucks pass through highways every couple of minutes so it can reduce the bad polluting.

Lastly, I urge CARB to set up a process whereby communities can petition CARB to weigh in and correct AQMD errors and bias in permitting and regulations.

Thank you for your attention, CARB
