Su: CARB Board Meeting Thursday June 25, 2020
20-6-4: Public Meeting To Hear An Informational Update On The
Control Measure for Ocean-Going Vessels At Berth

Re: Public Comments Submission In Response To Tanker Shipping Industry Comments

CARB Board:

The Coalition For A Safe Environment and the supporting et al organizations wish to submit our joint public comments on the proposed Control Measure for Ocean-Going Vessels At Berth Amendments.

We do not accept the majority of CARB management and staff recommended Amendments for the reasons that we have described in these written comments. In addition, there are numerous errors and omissions of information that the public has a right to know that we have also described in these public comments.

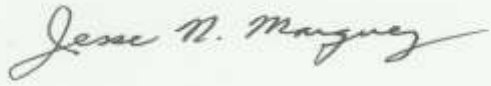

A speaker Saul ... at approximately 5:00pm representing the Tanker Ship Industry stated that the Ship Emissions Capture & Treatment Technology has never been tested or proven on a Tanker Ship. Advanced Environmental Group (AEG) the manufacturer of the AMECS-Advanced Maritime Emissions Control System has asked the Petroleum Industry to provide a ship for testing and demonstration and all companies have denied.

The Port of Los Angeles, Port of Long Beach, South Coast AQMD and CARB have done nothing to facilitate a test or demonstration project.

AEG has designed and built a new unique AMECS SPUD Barge design specifically for the Tanker Ship Industry. It addresses all Tanker Ship Industry Safety Concerns and design engineering information was submitted to the U.S. Coast Guard for their review and comment. The U.S Coast Guard found no safety issues.

For additional information the primary contact is Jesse N Marquez for these public comments.

Respectfully Submitted,

A handwritten signature in cursive script that reads "Jesse N. Marquez". The signature is written in black ink on a light green rectangular background.
