Hello,

For too long South Central Los Angeles has suffered the consequences of being exposed to toxic air, poor oversight by regulatory agencies, lack of enforcement on polluting industries, and lack of prioritization of community health.

In order to address this:

- Our communities have learned and organized around air pollution and South LA deserves the opportunity to improve air quality and address the legacy of contamination of oil drilling, auto body shops, dry cleaners, and metals facilities.
- Our communities want real improvements and investments in clean production and real solutions that will ensure the health and well-being of our families and communities are protected.
- Our vision can be accomplished by cleaner air, a Just Transition of key industries-of-concern, holding agencies accountable to communities of color and low-income communities

Thank you California Air Resources Board for consideration of South LA. We hope we can work together towards cleaner air for a healthier and just South LA.
