California TFS

September 18, 2019

Dear Members of the California Air Resources Board:

Environmental Defense Fund is delivering the signatures of 1,154 of our supporters (871 of which are from California) who have submitted an electronic comment in support of the California Tropical Forest Standard. For the sake of paper, we are only submitting one copy of the list of supporters. *This list is in addition to* the signatures of 25,589 supporters (5,787 of which are from California) that were submitted by the August 29, 2019 public comment deadline. **This is for a grand total of 26,743 signatures, 6,658 of which are from California.** The comment they each submitted reads:

"I strongly support California using the state's global influence to protect tropical forests through endorsement of the Tropical Forest Standard.

"Cutting and burning tropical forests like the Amazon threatens their unique animals, plants and millions of people who depend on them to survive. Deforestation also contributes more greenhouse gas emissions than all the cars, trucks, and ships in the world every single year - stopping it is a critical step to avoiding dangerous global warming and meeting the goals of the Paris climate agreement.

"California's proposed Standard for rainforest credits would create incentives to protect tropical forests -- whole forest landscapes, across entire states or nations. It would also require that programs producing rainforest credits consult and collaborate with indigenous and other traditional communities who use and safeguard forests. And that their communities are partners who benefit from these programs. The money generated from the sale of the credits directly benefits the programs that are protecting forests, reducing emissions and creating sustainable indigenous livelihoods that are in harmony with and strengthen their cultural traditions.

"The world must address the loss of tropical forests to stop climate change. Now is the time for California to directly promote the reduction of greenhouse gas emissions from the cutting and burning of tropical forests. We can't save the climate without tropical forests. The California Air Resources Board should endorse the California Tropical Forest Standard."

Please feel free to contact me if you have any questions or concerns about this submission.

Thank you,

Heather Shelby
Manager, Grassroots Organizing & Activism
