Dear Clerk of the Board,

Oak Harbor Freight Lines appreciates the opportunity to provide public comment on the Proposed Advanced Clean Fleets Regulation (ACF).

There are 5 huge problems with requiring electric trucks at this time:

1. We can't get the trucks
2. They cost 4 times a normal truck
3. They don't have even close to the range needed. We run our trucks at night on linehaul and then do pickup and delivery during the day. Most trucks run 24 hours a day. Electric will not work for our application.
4. They are 8000 lbs heavier, causing more damage to roads and decreasing payload.
5. We lease most of our CA terminals and would have to spend many thousands of dollars to bring in the needed electricity to terminals we don't even own.

We urge you to amend the ACF regulation for more flexibility so that the regulation catches up with technology and not technology catching up with the regulation.

Thank you,  
Oak Harbor Freight Lines

Sincerely,

Dan Vander Pol
