RE: Comments in Support of Electrify America LLC's Cycle 2 California Zero Emission Vehicle (ZEV) Investment Plan

Dear Chairwoman Nichols,

On behalf of Brixmor, I respectfully submit the following comments in support of Electrify America LLC's Cycle 2 California ZEV Investment Plan.

As outlined by Appendix C of the 2.0-Liter Partial Consent Decree, Electrify America will invest \$2 billion in ZEV infrastructure, education, and access efforts over the course of a decade, enabling millions of Americans to discover the benefits of electric driving with the added goal of increasing overall ZEV adoption across the United States. \$800 million of this investment will be made in California.

Brixmor's partnership with Electrify America has already resulted in six DC fast charging sites in California alone, which are currently in various stages of development, including the first two sites to go live in November 2018. As a host site of an Electrify America charging station, we have partnered with the company to offer electric vehicle charging capability as an additional amenity at our location and believe it will be beneficial to both our customer base and to our local community as a whole. Electrify America's investment in charging infrastructure is unprecedented, and Brixmor welcomes its association with the broader effort to increase the public's awareness of ZEVs. Approval of Electrify America's Cycle 2 ZEV Investment Plan will only continue to positively support this endeavor and will mean continued investment in businesses, workers, and communities across California.

In closing, Brixmor looks forward to the California Air Resources Board's timely and positive approval of Electrify America's Cycle 2 ZEV Investment Plan so this tremendous opportunity to promote ZEV adoption continues unabated in the State of California.

Sincerely,

Howard Porter
Vice President, Specialty Leasing
