To CARB,

My name is Seonghee Lim, who is an Oakland resident. I registered for CARB meeting, which will be held on Feb. 10, 2022 at 4 pm; however, I will be working at that time and will not be able to join the meeting. So, I am submitting my written comment via email. I hope that it is accepted. I have attached my letter to this message and also cut and pasted the content below. Thank you for your time and consideration.

To California Air Resources Board (CARB)

My name is Seonghee Lim. I live in Oakland, California. I am writing this to advocate East Oakland to be selected as an emissions reduction plan community.

I have been a member of the Communities for a Better Environment for over four years. During the time, I had joined many "community walk" activities by which we walked through the community near AB&I Foundry and talked with residents regarding air pollution and its health impacts. Residents shared with us about their health issues and we found that most of the residents were suffering from asthma and other respiratory diseases. It was devastating for me to see that most of all children who were born or growing there were suffering from asthma.

Beyond having AB&I Foundry, East Oakland has so many trucks passing by on Highway 880, the East Bay Crematorium (burning up to 3,000 bodies/year), Argent Materials, Sterling Environment (asbestos abatement corporation), etc., which are located very close to residential areas. Historically, residents in this community have been impacted by racial and environmental injustice for a long time. An emissions reduction plan under AB617 will provide some justice to the residents in East Oakland, although it won't be enough to remedy all the harms done.

Thank you for your consideration.
