Comments on AB 617 4TH year selections.

Congratulations on another year of AB 617, and associated funding. I'm sure the Board Hearing will be filled with praise for CARB's Success!

However, you should know that CARB is potentially incentivizing a Sewage to Power plant across the street from South Sacramento's AB 617 community. The community was not made aware of this, and it's CEQA exempt, despite trenching, and significant construction work there. Do you envision a scenario where they don't get LCFS or Cap & Trade credits? This is the same location as a Title V facility that managed to escape AB 617 scrutiny, because the boundaries stopped across the street from it. The air district fought for that.

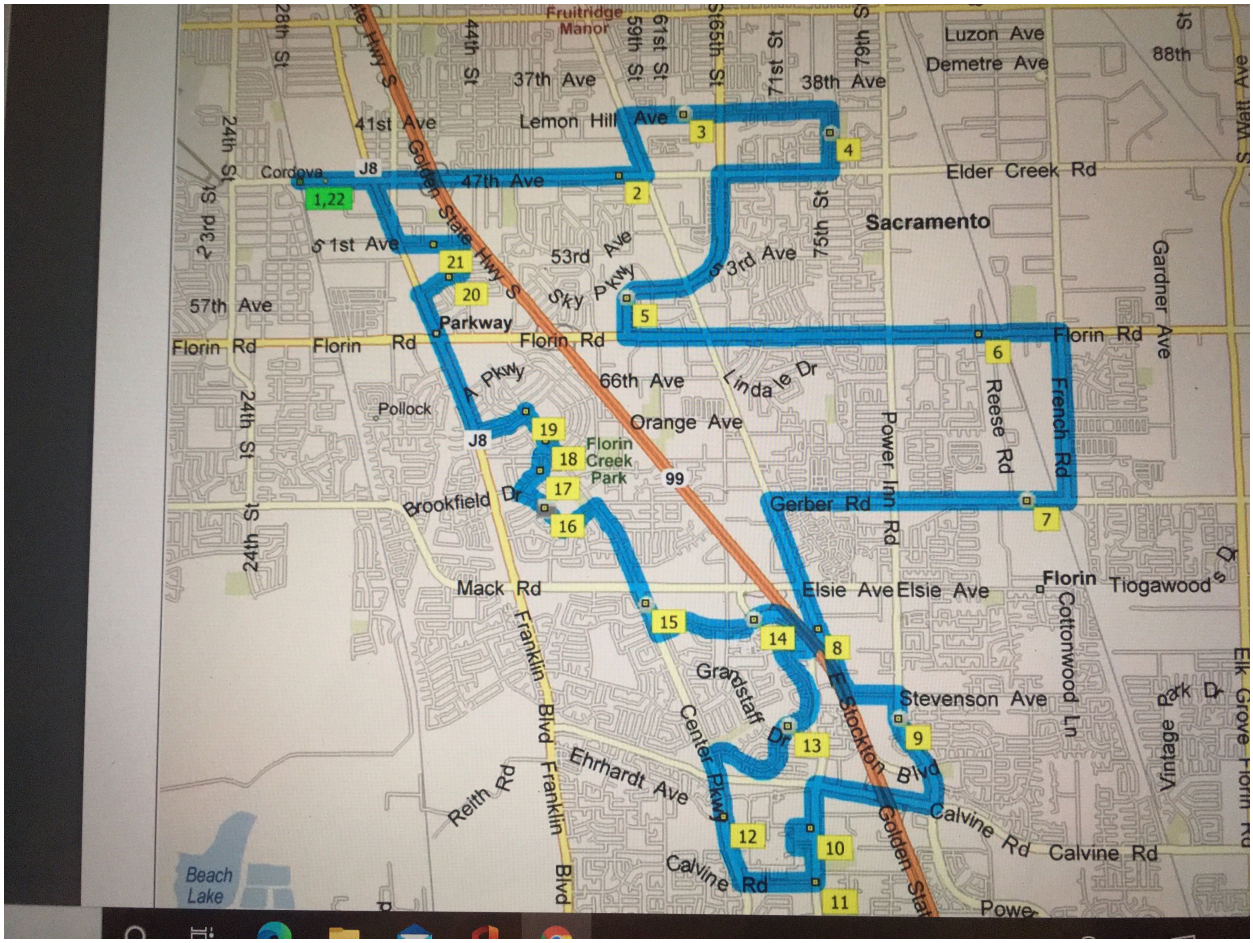
The gentlemen in the attached picture (picture submitted by an ally already) lives directly across the railroad tracks, from the AB 617 boundaries. The boundaries stop about 150 feet short of his home. His home is, arguably, wracked by more pollution than 95% of the AB 617 area. He serve board of AB 617, or the sewage to power plant. No one in his neighborhood that I spoke with (about 15 people) heard about either. He said he has asthma, as do many around him.

Your Board includes many folks who also serve on Air District Boards, and as politicians tasked with bringing business to their community. That's part of the problem. As a Board paralyzed by the moderates' desire for a peace based on a lack tension, as described by Dr. King, the rest of the Board will pout to a Board member if it's their area. Is that how justice works, or fulfilmet?

To the best of my knowledge, the South Sacramento Stroking Community has still not taken the tour of permitted facilities. They took a tour that purposefully avoided them. (see attached)

So, as you celebrate another year of success, know that the injustices inflicted on South Sacramento in the name of AB 617, have been swept under the rug. And every praise for future communities while the injustice continues south sacramento, tarnishes that praise. And it makes the injustice against the most vulnerable that were left behind, even worse.

Albert Einstein once said, "It is better to be of value to society, than to be a success."



Stairway.
