To whom it may concern,

I am writing this letter, because I recently heard that the Air Resource Board, is thinking of giving another extension to trucking companies that have three trucks or less. We are a small company as well since we only have 5 trucks, but we run our company by the rules, and don't wait till the last minute to take care of what is necessary, we have had to put lots of many into our trucks to run the business, as the Air Resource Board wants us to.

I feel that giving an extension to these small companies at this point is unfair to those who run their business, by the rules and don't procrastinate. I have an uncle who was getting ready to retire next year, he also only has one truck and he just put \$18,000 into his truck, it sure would have been nice for him to have had that extension as well, very unfair. My brother-in-law who is also an owner operator with only one truck also traded his 2007 truck in, to get a 2010 truck and had to spend another \$50,000, to be able to run by the rules, I think it is very unfair to all of us, who always do things the way they are suppose to, and these others continue to get break after break. These are also the same trucking companies who also continue to mess up the trucking Industry, in a big way, since they don't run by the rules, don't spend the money they are suppose to, they then can do the job at cheaper rates, and there you go also taking our work.

One more time I do believe it is really unfair to all of the businesses who are loyal and work hard to do things the right way. I sure hope you will take my letter into consideration when making your decision.

Sincerely

Lucy Feijo
