To: California Air Resources Board

From: Public Citizen Members

Re: Proposed Advanced Clean Fleets Regulation

I am writing to urge you to accelerate your proposed 100% sales target of zero-emissions trucks from 2040 to 2036. The work CARB is doing to eliminate pollution from California's heavy and medium-duty trucks is admirable, but the climate and air quality crises demand more urgency from CARB than what is currently planned.

Trucks make up a small portion of vehicles on the road in California, but are the largest producer of our notorious smog problem and pose the most cancer risk connected to pollution from our transportation sector. Burning diesel creates one of the most toxic forms of air pollution for human health, and is linked to premature death, chronic heart and lung disease, asthma, and diminished lung function in children. A delayed timeline for 100% electric trucks will only lead to further health and climate impacts.

Please do right by everyone in California and bring 100% electric trucks to California on the swiftest possible timeline.

Signed,

908 Public Citizen Members:
