Dear California Air Resources Board,

I worry every day about the Climate Crisis we are now in – I am now hopeful to see some powerful steps on the horizon that we can take to address this!

I implore you to enact and robustly enforce an Advanced Clean Truck (ACT) rule that requires that by 2030 at least 30% (more if possible!) of the new trucks on California's roads are all electric, zero emission vehicles. In other words, I'm urging you to continue pushing for drastic reductions in GHG emissions through the (now) biggest leverage point, our transportation, moving forward.

Please recognize this critical moment to support permanent reductions in toxic tail-pipe emissions BEFORE we all return to the bad old "Normal".

The many benefits are clear. Please act boldly for our children, the Natural World, the future!

Sincerely,

Jeralyn Moran
