Dear CARB,

I strongly support passing a mandate that 30% of heavy trucks sold to be electric, zero-emission vehicles by 2033. In addition to reducing greenhouse gas emissions and improving air quality and public health in vulnerable communities, adoption of the rule will incentivize and accelerate battery development that will boost EV adoption across the nation.

The world is watching what we do in California and we need to lead in taking steps to reduce climate change in any way possible.

Regards,
Diana and Brian Moss
