

Clerk of the Board,
California Air Resources Board
1001 I Street
Sacramento CA 95814

Subject: Ambient Air Quality Standards.

Honorable Chairperson, Board Members and Staff:

The terms Attainment and Non-attainment are fairly self- descriptive , but others not so by far. Could a small glossary of terms or definition when used be made available to bring your into compliance with standard English usage , or at least a small step towards it?

The regional grouping can be a two edged sword as in my area. Fining vehicles to fund districts can reward it for non attainment,

Environmental Justice should not be a sop to the working class to promote acceptance of bad air, Nor should it be used for questionable uses as paying to remove a board members grape papers or for fire place inserts when valley hovels rarely have chimneys. Would not a chimney charge on new construction be a consideration.

Ag burning on non attainment days and blaming results on fires from santa anas blowing the opposite shows too much local cronyism. Should not state wide standard be also available to counter this?

Sincerely
