Hello,

As you know, transportation is one of the biggest sources of greenhouse gas emitters today. Let California lead the worldwide sustainability movement by making sure we do not water down the Advanced Clean Truck rule, and ensure that by 2030, 30% of new trucks produced are electric! This decision would be beneficial for the planet, the sustainability of life as we know it, and for the transportation sector, because fossil fuels aren't an infinite resource but electricity is. Here is my docket: 5679973826725138487

Thank you,
Carolyn
