

May 31, 2022

To the California Air Resources Board:

I support the California Air Resources Board's plan to set strong emissions standards for new cars and light trucks manufactured between 2026-2035, and the goal of ensuring all cars sold in the state by 2035 are zero-emission vehicles. I also urge you to ensure that this transition to a zero-emission future is truly equitable for all consumers by requiring vehicle manufacturers to do their part in making electric vehicles truly accessible to all communities, especially low-income and disadvantaged communities.
