**RE: Pacific Gas and Electric Company Letter of Support on Electrify America's California ZEV Investment Plan: Cycle 2**

Pacific Gas and Electric Company (PG&E) appreciates the opportunity to support Electrify America's Cycle 2 California Zero-Emission Vehicle (ZEV) Investment Plan.

While ZEV adoption in California has outpaced other areas of the United States, continued investment is required to meet California's goals of building 250,000 EV charging stations, including 10,000 DC fast chargers, by 2025 and having 5 million ZEVs on California's roads by 2030 (Governor's Executive Order B-48-18). Electrify America's investment, as required by the 2.0L Partial Consent Decree, is an important component of California's ability to meet these goals.

PG&E supports the Electrify America Cycle 2 Investment Plan's focus on ZEV-fueling infrastructure (\$153 million) and brand-neutral education, awareness, and marketing (\$27 million). These proposed activities will lead to the development of additional, and much-needed, electric vehicle (EV) charging infrastructure across the state, and it will improve public awareness of ZEV options. It is also important that these investments will benefit low-income and/or disadvantaged communities as Electrify America will strive to ensure that 35% of its investments are in those areas.

Throughout Cycle 1, PG&E has worked closely with Electrify America to provide electrical service to EV charging sites being developed within PG&E's service area. We look forward to continuing to work with Electrify America as they deploy their Cycle 2 investments.

Thank you for the opportunity to engage on this important issue.

Sincerely,

/s/
