

To the California Air Resource Board:

We, the undersigned, urge you to revise the California Air Resources Board's climate scoping plan so that it meets the scale and urgency of the climate crisis and environmental racism here in California.

As currently drafted, CARB's plan is an abdication of climate leadership and a failure of ambition. Instead, we urge you to take bold action rooted in justice, and to reject the half-measures and long timelines envisioned in the plans under consideration.

We call on you to pursue the following:

- Establish a target of near-zero gas emissions by 2035. Retaining the grossly inadequate target of "carbon neutrality" by 2045 is a recipe for disaster, and it would cause further delay we can't afford.
- Rapidly phase out fossil fuel production and transition to 100% clean renewable electricity by 2030. This must include rejecting all new fossil fuel infrastructure NOW, an immediate halt to drilling permits, and decommissioning oil wells within 3200 feet of sensitive locations.
- Invest in public transit and move to 100% electric new car sales by 2030 and 100% electric trucks by 2035. Stop all new gas appliance sales by 2025 and invest in supporting the transition off gas.
- Reject all industry scams that lock in pollution and promote environmental injustice. This includes carbon capture, hydrogen, trading, offsets, and factory farm biogas. Every dollar we waste on these industry scams is a dollar taken from communities and efforts to facilitate a real transition away from dirty energy sources — which are causing climate change intensified disasters like wildfires, flooding and droughts, while polluting our communities.

Please support sustainable land practices and environmental justice in the transition. Taking these bold actions would provide a model for other states to follow. And it would show the country and the world that California is ready to lead us back from the climate cliff and toward a sustainable, livable future. We are counting on your leadership.

Signed,
