Dear Board members,

Work trucks and delivery vans, while just a small fraction of all vehicles on the road, are some of the largest sources of air pollution in the transportation sector. I support the passing of the Advanced Clean Truck rule. CA is a leader on climate change, this truck electrification manufacturing requirement will continue it's legacy towards that direction. This requirement will make the technology more affordable, and we must act now during these times because goods movement is still essential during COVID 19.

Thank you,

Laura Shady
