Good afternoon,

The system was not accepting my written public comment, so please forward this on to CARB board members:

My name is Caillie Roach and I a student at the University of Redlands. I support this rule because I care about the impacts of climate change and the unjust impacts on our communities of color. I think you care about our community's health as well. So, please, pass this bill to provide relief to those impacted by poor air quality. Just in the short four years I have lived in the Inland Empire, I can count the number of days I could see the mountains clearly on two hands. Transitioning to an electric fleet is not a choice— it is our responsibility to ensure clean air is a reality. CARB has the opportunity to improve our health and the future of the planet for decades to come. Seize this moment. I urge the CARB board to vote YES for the advanced clean truck rule.

Kindly,

Caillie Roach (*she, her, hers*)
University of Redlands | Johnston Center for Integrated Studies
Co-President of Students for Environmental Action
Outdoor Programs Trip Leader
