

Stop "Diesel-death zones" in California — We demand 100% zero-emission trucks by 2035!

The **298** constituents below are in support of bold action from the California Air Resources Board to deploy 100% zero-emission trucks by 2035

Dear Chair Randolph, Executive Director Corey, and Members of the Board,

We, the undersigned, are concerned California residents writing to urge you to pass a regulation that achieves 100% zero-emission truck sales by 2035. Low-income communities and communities of color have long-breathed in toxic diesel pollution from the medium and heavy-duty vehicles on our roads at disproportionately higher rates. And our communities are already feeling the effects of climate change: from hotter, drier days to the unbearable smoke and devastating flames of increasingly worse wildfire seasons.

CARB's own analyses have projected that a rapid transition to 100% zero-emission trucks by 2035 is necessary to reach California's climate and air quality goals. I strongly encourage you to phase out the production of new diesel vehicles by 2035 and ramp-up targets to get there. I also urge you to provide support to small businesses and workers in adopting zero-emission trucks to ensure a just transition for all.

The potential benefits of committing to 100% zero-emission truck sales by 2035 are significant and must be set into motion now. A strong rule can prevent numerous premature deaths, improve quality of life for communities with respiratory or cardiovascular issues due to air pollution, reduce health costs and missed workdays, and generate thousands of clean jobs. Please achieve 100% zero-emission truck sales by 2035 to bring cleaner air to our communities as soon as possible.

Sincerely,
